### HAVING PROBLEMS BLOWING HAYLAGE? TRY THE GEHL SUPER BLOWER - TWO BLOWERS IN ONE!

No more waiting in the field for the box to come back. The 99 ends silo bottlenecks. It matches the round trip speed of your best forage box. Most self-unloaders won't unload fast enough for it.

When compared to conventional blowers, the FB99's twelve staggered fan blades, six on each side of the rotor, actually give you two blowers in one. The timed delivery of material from the alternate paddles provides maximum use of available space in the nine inch pipe. Result is increased capacity without increasing pipe size. Alternate paddles provide a steadier flow of air and material. Pressure and velocity is maintained as material is blasted up the pipe. No gaps. No slowdowns.
