Get the totally new compatibility agent...
THAT WORKS.

UNITE is Hopkins totally new compatibility agent with a unique chemistry that assures uniform dispersion of active ingredients in liquid fertilizer-pesticide mixtures. UNITE prevents separation and coagulation. Time tests prove no unwanted changes in many mixtures even after 24 hours. With UNITE, what you put together stays together.

A little UNITE gives you trouble-free spraying, accurate application, more effective pesticide results. Economical too — use 1-3 pints per 100 gallons

FOR NO-TILL for early post-emergence
Banvel® + atrazine
herbicide tank-mix combination kills young, tough broadleaves, vines, before they damage your corn.

Banvel + atrazine together do a broad spectrum job on weeds resistant to 2,4-D and not controlled by atrazine alone including tough to-control foxtails, Canada thistle, cocklebur, smartweed, velvetleaf and others.

Spray up to 3 weeks after planting when grasses are less than 1 1/2 inches tall. When Banvel® + atrazine is applied according to label instruction control usually lasts until corn is big enough to shade out late germinating weeds.

Order Banvel Herbicide plus atrazine today as an important step toward total farm weed control.

NOTE: Before using any pesticide, read the label.

MATERIALS:

- Granular 20% Super Phosphate
- Borate
- Potash
- Urea
- Zinc
- 4-44-0 Micronutrient Mix
- K-Mag
- DAP
- 30%
- Ureaform
- Triple
