

June is Dairy Month

**OUR NEWEST INNOVATION
IN DAIRY
EQUIPMENT**

THE DV 300 MILKER UNIT

If you're looking for a new way to do an old job better, the DV 300 may be the answer. When the DV 300 milking routine is followed, it's easier on operators, gentler on cows. It can mean more productivity per man hour and more profit for you.

The unique DV 300 system is designed to sense milk flow and automatically shifts vacuum levels and pulsation rates between stimulation, milking and post milking. The result can be less strain on the cow and operator because it is designed to provide a more efficient milking routine.

The DV 300 provides affordable semi-automation for stanchion barns or parlors, high or low line systems. The DV 300 is extremely flexible and is compatible with systems sized to today's standards. Because each unit is so compact and lightweight, the DV 300 is completely portable and easy to move from stall to stall. It cleans easily and completely.

The new A.R.M. (Automatic Removal Mechanism)

Another
"first" from
De Laval

Now you can handle more cows with fewer man hours without adding stress to either cows or operators.

- Accurate sensing of milk flow
- True flotation parallel linkage
- Positive vacuum shut-off
- Prompt removal and retraction
- Attaches easily to high & low udders
- Adapts to high curbs

Whether you're planning a new installation or remodeling your present parlor, the A.R.M. may be right for you.

To really appreciate the advanced features of De Laval's A.R.M., you must see it.
