

Hot dogs a popular cook-out meat

WEST CHESTER - One of the all-time favorites for cooking out-of-doors is the popular hot dog, says Trudy Dougherty, Chester Co. Extension Home Economist.

One has two choices of two hot dogs but many prices and various sizes. The most expensive choice is "all beef." No other kind of meat

is allowed. Because they are made from beef only, they cost the most. "All meat" franks are made from a combination of meat and meat trimmings, generally beef and pork. There are three categories of all meat hot dogs. One category is hot dogs made from skeletal meat or meat closely

trimmed from bones, including up to 15 per cent poultry meat. Another category is franks made with by-products, which includes variety meats such as heart, tongue, spleen, tripe and poultry products including skin. Still a third category are those made with by-products in addition

to non-fat dry milk added. There are imitation hot dogs, made with soy protein; all chicken franks; plus Kosher hot dogs made from all beef and processed under Rab-

binical supervisor. One should always check for net weights, size of hot dogs and number per package. There is a big variation. Because

no two formulations of the kinds of meat used in the processing of hot dogs are the same, prices will vary considerably among labels.

NEW WHEAT SCAB in PA - mentioned in 2 articles in June 30th Lancaster Farming. Also occasional mention of other new diseases and pests - army worms in barley. Where will it end?

HIGH GAS PRICE INFLATES FERTILIZER PRICE. ORGANIC FARMING SOLVES BOTH PROBLEMS.

Our program also exceeds in yields at less cost. Mr. Thompson, an orchardist in Virginia said he applied 3 ton of rock phosphate per acre and a lot of earthworms when he planted his orchard 20 years ago, and applied nothing since except yearly sea kelp foliage spray, no chemicals. He said his soil is still rich (I couldn't sell him anything) and he ships lots of nice fruit, some to local Pa. health food stores. Soft rock phosphate doesn't evaporate or leach out. A high ratio of it compared to potash is good anyway, according to the high yields that the Reams program is producing. The wise thing to do is apply it now before price increases - after hay and wheat and corn and on pasture. Only \$80 per ton bulk plus spreading. We need some orders in advance. It comes by railroad from Florida. We have no storage. Also in bags at \$90 per ton.

LEARN SOIL TESTING AND BALANCING

For extremely high yields with the Reams program. And the feed value and quality is extraordinary. Much more nutrition than the chemical way. A seminar by Carey Reams and Rick Bishop at the Sheraton Inn, Harrisburg, Pa., July 23 to 26.

Ask us for details and literature. You can become a soil consultant and charge for soil testing and consultation besides keeping close check on your own fields free and have the satisfaction of helping others.

SPECIAL "OFF CAR" INTRODUCTORY PRICE on the fantastic new **MINERAL-72**, mined in Nevada. We get a special price on first car and pass it onto you if taken right off the car on arrival, due anytime. Call quickly. **DOCTORS & NUTRITION EXPERTS** praise it for humans. Farmers and Louisiana Agriculture Experiment praise it for livestock feeding and for on the soil. The latter says it is "very, very good" for both purposes. We'll get data on paper later. Called Mineral-72 because it has 72 different minerals and trace elements as it comes out of the mines. That is what makes it so good. A real buy at that price, even for fertilizer. Call quickly for literature in case car hasn't arrived. Give phone number and we'll call you when it comes.

SAVE GAS WITH CONKLIN CONVOY OIL, part synthetic with a special Molly additive. Frequently 1½ or 2 more miles per gallon. And Conklin Fuel Mate also save some, and motors burn cleaner.

SAVE HARDWATER CAUSED DETERIORATION without a water softener and salt expense, with a **BONAQUA** attached to pipe. It really works, proven locally. Only \$89.95.

SAVE HAY QUALITY by bailing greener before the rain, with **Fertrell Nutri-Sil**. Also well proven locally to keep hay from spoiling when baled greener. Only \$1.00 per ton of hay. Use Gandy applicator, or we sell the Mellinger.

SAVE YOUR CROPS FROM PESTS AND BLIGHT and also save fertilizer with our **BX soil bacteria** which makes soil healthy and releases fertilizer in the soil. Also well proven. Almost unbelievable. The answer to high chemical costs. Free literature on all our products.

LET US TEST YOUR HAY, PASTURE OR WHEAT FIELD BY OUR REAMS TRAINED MAN AT OUR STORE. ONLY \$10. Free with an order for a load of phosphate.
