**You save money, day after day,
with corn-soy and Vigortone.**

Want to save money on your swine rations? When you take charge of ration content and quality, you start saving from the very first day.

To take charge of ration content, buy only what you don't grow on your own farm. Then, grind and mix the rations yourself — fresh — from pre-starter through finishing. You'll never have to worry about freshness again. Better yet, these steps alone eliminate several middle-man costs and handling fees.

To take charge of ration quality, follow Vigortone fortified corn-soy feeding programs. Vigortone swine pre-mixes assure that your rations always

contain proper levels of major minerals, trace elements, vitamins, and other nutrients. In addition, corn-soy and Vigortone furnish the right level and balance of all essential amino acids.

This simple approach keeps your out-of-pocket feed costs low. What's more, it actually promotes better feed conversion for lower cost of gain.

Your figures will prove it.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's low-cost swine feeding programs with any other you name.
