Are You Using A Tank Full of Oil A Month? Switch To Multi-Fuel Heating & Use A Tankful a Year.

The secret of any family's low oil consumption is neither long underwear nor frequent trips to the Bahamas. It is their HS Tarm combination boiler. This boiler for central hot-water systems allows them to burn wood and oil. When fueled with wood, it heats their house and provides oceans of hot tap water as well. Should the wood fire go untended, the oil burner will continue to supply all their heating and hot water needs.

Imported from Denmark, the HS Tarm boiler displays traditional Danish quality in design, construction and performance. It is available in three sizes, and comes with American-made and approved controls and equipment. See less of your oil delivery man.

Also can be fired with coal, coke, refuse & electricity.
