Inter-State Cooperative's directors meet

SOUTHAMPTON — A high net savings report, the unveiling of new horizons and a strong market thrust were the highlights of Inter-State's two-day Board of Directors' meeting sum-marizing the year's work held last week.

"Despite a fire, a flood and fuel shortages, Inter-State Milk Producers' Cooperative ended its fiscal year with nearly one-half million dollars in net savings," Dr. James E. Honan, general manager told the Board of Directors, staff and Young Cooperators during a twoday board meeting August 29 and 30, 1979. Honan credited the successful year "to oard policies, making sound business decisions, efficient management and the constant surveillance of the farmer's dollar."

"This has been a year of new horizons," asserted Lester C. Jones, president of directors of the new horizons year." in production, cash reserves

and milk quality achieved by the cooperative while solving the year's problems. Jones, also a member of the Executive Committee of the National Milk Producers Federation, Washington, D.C., reviewed national concerns to the dairymen; first, the need to have consumers better informed: and secondly the need to continue keeping the milk price as low as possible with a fair return to the farmer who has been caught in the inflation squeeze as are other segments of our economy.

Robert M. Dever, treasurer, reported that with 'shake-down' problems at Holly Milk Cooperative and a fire in the 'mılk bed' part of the dryer, this resulted in higher hauling costs to move milk south and west. However, it was a good year at Inter-State. A new total high in Inter-State. President Jones milk sales of 240 million told the 22-man board of dollars was achieved this

Ivo V. Otto, Jr., president

of Holly Milk Cooperative Board of Directors presented a detailed account of the progress and problems at the Holly Milk plant, Mt. Holly Springs, Pa. "We have over one million pounds of whole milk powder ready for sale," Otto announced.

Daniel L. Martin, vice president of Inter-State, gave an update of the Order

4 Milk Promotion and Advertising Agency. "We have not been able to get 100 per cent of the dairymen to advertise their product," said Martin. "It is a shame that a few farmers will not cooperate and volunteer to help pay the tremendous expense of today's advertising. Our Middle Atlantic dairy farmers have the highest percentage in the

nation for contributions to promotion and advertising, but some continue to be 'free loaders' in the market place and refuse to pay their fair share," Martin concluded.

The 3,000 dairymen who are members of Inter-State Milk Producers' Cooperative produced in excess of two billion pounds of milk during the past fiscal year. InterState dairy farmers live in six states including Delaware, Maryland, New Jersey, Pennsylvania, Virginia and West Virginia.

The two-day board meeting concluded with reports from various departments within Inter-State with an optimistic forecast as the cooperative begins its 1979-80 fiscal year.

PFA names R. W. Newpher to new post

CAMP HILL - Richard W. Newpher has been named administrative secretarytreasurer of the Penn-Farmers' sylvania Association, effective Nov. 15. Newpher currently manages PFA's public affairs department, where he directs the organization's lobbying efforts.

Newpher succeeds Charles Mohn, who became chief administrator following the resignation of Charles Ord on July 19.

A native of Clearfield County, Newpher joined PFA in 1973. He joined the Public Affairs Department in May, 1976 as legislative specialist, assisting department manager, E. Chester Heim, and training county legislative com-

mittees. In February 1979, Newpher became Public Affairs Department manager, succeeding Heim who resigned to become Deputy Secretary of Agriculture for Pennsylvania.

Newpher, 33, is a graduate of Clearfield Area High School. He studied electrical engineering at Penn State University and is a graduate Banking, Washington, D.C. Before joining PFA, he was employed by the Citizen's National Bank of

of the American Institute of Herndon, VA. Newpher resides in Shermansdale, Perry County, with his wife, Pat, and two sons, Brian and

Eby named to Weaver personnel post

Beth L. Eby, 107 Granger Road, Leola has been promoted to the position of employment supervisor, Personnel Department of Victor F. Weaver, Inc., a New Holland food processor.

Miss Eby is a graduate of Eastern Mennonite College, where she received her Bachelor of Science degree in Home Economics and Sociology.

She joined Weaver in 1978 as an assistant employment supervisor, after having served as a case worker at Catholic Social Services of

Beth L. Eby

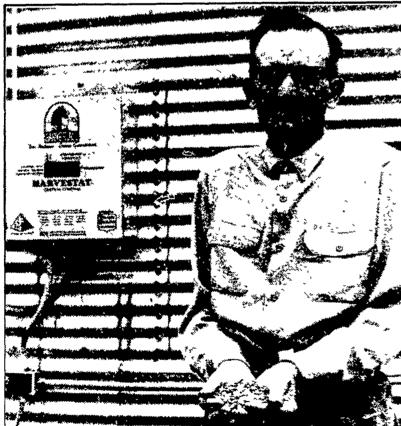

Lancaster County and a field director of the Pen Laural Girl Scout Council.

In her new position as employment supervisor, Miss Eby will be responsible for the employment of hourly production and clerical personnel, retirement counseling, and other associated employment activities.

BIG **HARVEST** SALE **SEE PAGES** 30 and 31

> "Harvestall hillcuring works.

Clarence Harnish, Lampeter, Pa.

This was my first year with the Harvestall When my corn was dried commercially last year it cost me 27¢ per bushel. With the Harvestall it didn't cost over 61 ¢ per bushel and the test weight was 58 to 59 lbs

I'm pleased with the quality corn I get and I'm pleased with the savings I would recommend the Harvestall system to farmers who are looking for storage or drying because it has done for me the job it was designed to do

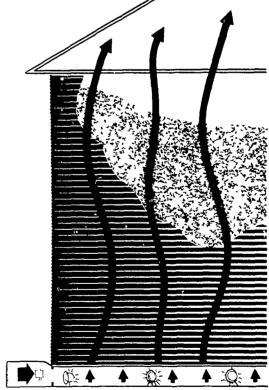

quality corn for less cost."

CALL NOW TO GET THIS YEAR'S CROP IN A HARVESTALL.

The Harvestall **Chillcuring System**

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter You'll never see white dust in Chillcured corn You actually save half of what you're used to losing in heat shrink

There's no gas or oil to buy Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense Find out more about
