FREDERICK, Md. - It's Fall festival time again at historic Rose Hill Manor Park in Frederick, Maryland. The Frederick County Farm Museum Association in cooperation with the Rose Hill Manor Children's Museum will hold the weekend event on Saturday and Sunday, October 13 and 14.

This fourth annual Fall festival is a family oriented activity with something to interest young and old alike. The young will delight in the live farm animal exhibits and the 4-H Dog Obedience Demonstration on Saturday. The Children's Museum committee of Rose Hill will

also hold their annual Kinderfest on Saturday with all events planned especially for children. The not so young will relive memories as they view old steam and gasoline engines, the antique tractors and demonstrations of farm and home crafts from the past, like spinning and quilting.

Early visitors on Saturday morning will see a country butchering when six hogs will be processed into favorite pork products, all for sale. Fresh, hot apple butter will also be available as you watch it boiled in a kettle over an open fire. Homemade cakes will vie for honors in the Cake Contest to

be followed by the Cake Auction on Sunday afternoon.

Sunday's feature is the Antique Tractor Pull at 12:30 p.m. with five trophies to class winners. Not to be forgotten is the wide variety of great homemade country food - soups, sandwiches, cakes, pies, "butterflies", soft drinks and a complete dairy bar.

The Manor House, the 18th century home of Maryland's first governor, Thomas Johnson, and the surrounding gardens and grounds, will be in their autumn glory. The Children's Museum will be open with its "touch and

see" displays of early family life in Frederick County.

The Carriage Museum with its beautifully restored carriages, and the Barns with exhibits of antique farm machinery and implements will also be open. Costumed guides will assist you through the manor house and grounds, encouraging you to "touch and see" our heritage.

There is no admission charge to the Park and exhibits. Plenty of free parking space is available. Activities will begin at 10 a.m. on Saturday and noon on Sunday. Events will conclude at 5:00 p.m. both days. The Festival will be held rain or shine! Rose Hill Manor Park is located at 1611 North Market St., Frederick.

## SILO PRESS

### NEW LOW-COST WAY TO SEAL AND STORE FEED STUFFS EFFECTIVELY

IT'S A WELL BUILT MACHINE!

Nutritionists, cattlemen and dairymen agree sealed storage is the way to get the most from feedstuffs.

But, sealed silos are costly ... and immovable!

Now, you can seal and store silage and high moisture grains in low-cost plastic bags ... wherever you wish ... and retain maximum feed quality, quickly converted to more milk per cow or extra beef per pound of feed for faster, more profitable gains.

You also can reap an extra harvest in added benefits.

The Eberhardt Silopress has been used successfully in Western Europe for seven years. It's new in America...but catching on fast!

Compare this new concept with the system you're using now. Consider the benefits, advantages and flexibility. And also consider the cost.

Then, put a Silopress to work for you!

Practical, durable and versatile, the Silopress is designed and constructed for hard, continuous use. It is easily maintained. There are few moving parts. Lubrication is convenient.

It can be transported easily from field to field or farm to farm, maneuvered into tight places.

The Silopress may be operated with a tractor as small as 50 horsepower.

Bags are 8 mil. thickness, 8 feet in diameter. They come in lengths from 80-100 feet. Capacity: Approximately 100 tons per bag depending on material stored. Bags are American-made, readily available.

- Extensive research proves the Silopress preserves feedstuffs with minimal nutrient loss
- Feedstuffs come out of storage highly palatable
- Feedstuffs capable of being ensiled, sealed and stored in plastic bags include corn, alfalfa, oats, barley, wheat, coastal Bermuda grass, legume forages, native grasses, ryegrass, milo, sorghum, brewers' spend grain, distillers' grains, fruit packing byproducts and cannery byproducts. High moisture grains also may be stored successfully. In some instances, the Silopress has been used to store beef and chicken waste. Aspen wood is being stored experimentally for use as a feedstuff
- Storage capacity is unlimited. When extra storage is needed, another bag can be added. Each 80 to 100 ft plastic bag may contain 100 tons of silage on the average depending upon the moisture content and density of the feedstuff being handled. Bags are readily available.
- Highly mobile, the Silopress is equipped with transport wheels and converts quickly to tow position with an

overall width to 7 ft., 8 1/2 in. The machine can be towed behind a tractor or pickup on the highway.

- With a Silopress, you can store your feedstuffs any place on your farm ... wherever it can be fed most conveniently. Bags require no permanent foundations.
- Feedstuffs can be self-fed to cattle directly from the bag. To many livestockmen, this feature alone justifies use of the Silopress on their farms and ranches. Materials also may be removed with front end loader. The bag is filled in vertical layers, making unloading easier.
- For farmers wishing to store several different types of feedstuffs separately, the Silopress is ideal. A separate bag can be used to store each type of feed.
- With a Silopress, you can feed a number of different feedstuffs in whatever order you desire or in combination.
- Farmers who are renting their land can enjoy the advantages of sealed storage with a Silopress without the high investment costs and landlord-tenant complexities of conventional silos.
- The Silopress is well adapted to custom farming operations, bringing the advantages of sealed storage to both small and large-scale farmers. (In Europe, many Silopress units are owned by custom operators.)
- With a Silopress, you can harvest feedstuffs almost ir- regardless of weather ... rainy days no exception. Little or no silage is lost during work stoppages in filling. This system of storage will accept feedstuffs with wide variations in moisture content and still maintain feed quality.

Silopress will accept material from side or rear unloading wagons and trucks... or front end loaders

**CUSTOM SILOPRESS.

"One more crack about my hat, Harold, and you'll end up with an egg on your face." York Fair poultry exhibits, rapidly increasing each year, have given fair officials something to crow about.

This French Lap bunny was worn out from a week of greeting visitors at the popular York Fair, which hosted almost a half-million visitors last week.
