

CHORE-TIME[®]

INTRODUCING THE NEW

Chore-Time[®] Sow Feeding System... it takes the hustle and bustle out of sow feeding

The new Chore-Time Sow Feeding System takes the hustle out of your life—as well as the "bustle" out of your sows' lives.

And that could put a lot more muscle into your financial life.

With the Chore-Time system, there's no labor needed—so you don't have to hustle to hand feed individual sows or groups of sows. Each sow is individually fed, mechanically.

And with the Chore-Time system, there's no bustle or excitement to sows that your presence at feeding time causes using other methods. That's because you activate all the feeders at once from a remote location.

The Chore-Time Sow Feeding System is not just automated equipment—it's a new management tool for the producer looking for new ways to cut costs and boost production. Here's why:

- 1 Saves labor.**
No more hand feeding. Simply set each feeder to the pounds of feed each sow should get. Then each time you feed, trip one lever to feed all sows at once. The system then automatically refills each feeder so it's ready for the next feeding.
- 2 Saves feed.**
With hand feeding, there's a natural tendency to overfeed. This system dispenses only what each sow needs.
- 3 Helps you get larger, healthier litters.**
Independent tests show that the Chore-Time system can produce 75 extra pigs for each 100 litters. The reason is simple—the system eliminates feeding stress caused by hand feeding. It also feeds an accurate, controlled amount each time—keeping sows in proper condition. No wonder they produce healthier litters with 3/4 extra pig per litter!
- 4 Longer sow productive life.**
That's because keeping sows in condition means you can keep them longer—they'll produce more litters.
- 5 Longer equipment productive life.**
Each sow eats peacefully, so you eliminate fighting. Therefore, you cut wear and tear on pens and other equipment (and also on yourself).
