CASE IS #1 IN 4-WHEEL DRIVE TRACTOR SALES

Here are a few of the reasons why!

Only Case gives you advanced design solid state selective steering

FRONT wheel steering
Automotive-style control. Ideal for row crops, most field work, road travel.

COORDINATED steering. Rear wheels and front wheels are electronically coordinated for sharp, full power turning.

CRAB steering counteracts drift on sidehills. Controls implement overlap. Makes four tracks (eight with duals) for maximum traction.

REAR wheel steering with electronic rocker switch "fine-tuning" makes implement hook-ups much easier. Great for maneuvering around yards and buildings.

If you don't think 4-way selective steering makes a difference you haven't test-driven a CASE 4 WD tractor.

1. On the go power-shift transmission = no power loss. Standard in all 4-wheel drive models.
2. PTO shaft to utilize full engine horsepower without a safety cut off switch.
3. The best visibility on the market - sit in our cab and see for yourself.
4. 3 point hitch with quick coupler.
5. More horsepower to the drawbar for your fuel dollar.
6. 2 wheel drive steering for corn planting, cultivating & row crop work.

Only From CASE:
FINGERTIP STEERING SELECTION

ELECTRONIC SENSING

Flick...flick...flick! As easily as you'd operate a light switch you can switch on-the-go from front to rear to coordinated to crab steering. When you switch to front steer, rear wheels center automatically.
