

# SONS ETINGS ROM KALB

## XL-55a Yield Breakthrough

Pennsylvania farmers are getting excited about this big step forward in yield potential.

Big, long ears packed with large kernels; doesn't have to be planted extremely thick to really turn out the yield

Real eye-pleasing hybrid that's great for both picking and shelling

This high yielder fits the wide range of maturity requirements found across Pennsylvania

Fewer number of husks helps its long ears dry fast in the field

Fits the needs of every Pennsylvania farmer; responds especially well to good soils and management

Excellent ear retention, disease resistance and all-around performance are XL-55a bonus features

### XL-11 Short-Season Powerhouse

Rugged, vigorous hybrid from early spring throughout the growing season

Real short-season yield power for farmers all across the North

Big-eared hybrid with a loose husk that speeds drydown but still provides good tip coverage; helps protect you from a wet fall

Make XL-11 one of your top choices for outstanding yields of silage or grain

### XL-61 A Standing Performer

Makes the big ear Pennsylvania farmers know will deliver a bumper yield in the fall

Exceptional disease resistance; a real rugged, healthy addition to the DEKALB line-up

Exceptional quality grain hybrid that adapts to about any soil type
