

NEW FARM FUEL SYSTEMS

To make Methane and Alcohol is being introduced for the first time at the Pennsylvania Farm Show by Martin Distributors Inc.

The digester produces methane gas from manure which provides the fuel to run an engine with a generator, enabling a farmer to produce his own electricity. The hot water from engine supplies free heat to operate the equipment to make your own farm fuel (alcohol) from corn, which is a good grade farm fuel to run your tractors, trucks and cars. The exhaust heat from the engine is used to dry the mash which is corn left over from making the alcohol that turns into 32 percent protein feed (brewers grain). The same farm milling system that grinds the corn is also used to make a complete feed using the 32 percent dried mash to replace soybean meal.

The display will be set up and operating as much as possible on the inside of a grain bin located outdoors in the parking lot on the West side of the large arena. The bin will be heated from the excess engine and generator heat, showing how it can also dry grain at harvest time or either heat a building.

Are Your Feed Costs Too High?

Buying a complete feed, or maybe you're still struggling with a PTO mixer. Either way, let us show you how to cut feed costs, save a lot of time and deliver a superb feed.

Switch to MIX-MILL CENTRAL FEEDING SYSTEM

OUR SYSTEMS ARE FLEXIBLE SO NO SYSTEM IS TOO BIG OR TOO SMALL

- Full line of bucket elevator equipment.
- Totally automated Mix-Mill grinding/mixing.
- Versatile grain storage, 20 to 400 ton units.
- Automatic feed delivery systems.
- Latest on-farm grain-roasting equipment.
- Total system design/work-flow expertise.

MARTIN GRAIN DRYING SYSTEMS

Compare their unique features and advantages. Preserves grain quality, less shrinkage & stress cracks. Conserves energy, lower operating cost, from 3¢/bu. for 10 points. Both systems dry 35% moisture corn, requires no wet holding tank or babysitting. Both systems include a G.S.I. Drying Bin, in & out ladders, roof-ladder, Cor-lok floor, steel floor supports, transition, fan & heater, ventilator cleaner, motorized spreader, unloading auger system with total enclosed motor, and freight to our warehouse.

MARTIN FLO-MOOR SYSTEM

2 STAGE CONT. or RECIRCULATING

\$6695

Includes Martin Electronic Moisture Control With Motor Starters.

- Drying capacity up to 12,600 bu./day
- 15 to 36 ft. diameter bins.
- Operating temperature adjustable 90° to 160°
- Add wet grain as fast as you harvest. Large storage capacity for fast unloading.
- Twin tapered sweep augers unload faster
- Extra heavy gear box assures trouble free operation
- Automatic grain level shut-off
- Grain Cleaner removes trash for better drying

MARTIN LOW-TEMP SYSTEM

Batch With Low Temp. Control

\$3695

Stirring Equip. Option

- Drying Cap. Up to 6400 Bu Per Day.
- 15 to 48 ft diameter bins
- The only system with gas heat (up to 30°) backup to prevent spoilage.
- The Martin Low-Temp Control monitors and automatically controls the temperature and the humidity. The thermometer, hygrometer and monometer display operating conditions, thus eliminates all guesswork in the easy operating management.
- Built-in safety controls assure trouble free operation.
- It operates automatically around the clock in sunshine or rain, heat or cold, without any babysitting or readjustments.
