Livestock & Grain **Bodies** by OMAHA STANDARD

Steel Grain and Livestock Bodies

Available in heights of 28", 40"
and the extra capacity 52" sides.

Rugged one-piece roll-formed sides

Check our body carefully. You will find tough 15 gauge steel on our familiar 28" and 40" steel body sides and even heavier 14 gauge on our large capacity 52" side. Sides in all sizes are manufactured by continuous-process roll forming. The result is a one-piece, durable side with maximum corrugation for maximum strength. There are no welds to break, no warping under stress.

Steel body shown with optional 12" tip tops, which are available on 28", 40" and 52" steel sides in all lengths.

"Rolled-in" Tarp Rail

Omaha Standard pioneered the rolled-lip type tarp rail that protects tarp and hands. Our tarp rail has no seams or welds because it is roll-formed as part of our one-piece side. This provides greater side strength. This provides greater side strength. Specially designed bottom flange insures grain tight seal.

Heavy gauge roll-formed steel stakes

Full "hat" style construction from heavy gauge steel offers superior side strength. Additionally, each stake base is reinforced with a backing plate for greater rigidity. Stake placement every 24 inches means up to 20% more stakes per body. All this adds up to greater structural strength.
