

Juniata reports Dec. DHIA

JUNIATA COUNTY DHIA
December 1979

The December 1979 report of the Juniata County Dairy Herd Improvement Association records calculated records for 2,479 cows in 44 herds

The five high herds in average butterfat production per cow per day are listed below. Owner's name and address, number of cows, average daily pounds milk and butterfat per cow, are given in order.

| | | | |
|------------------------|----|------|------|
| Freeburn & Norman Love | 53 | 56.0 | 2.16 |
| Kenneth Deamer | 32 | 50.1 | 1.90 |
| Clyde D Moyer | 49 | 49.8 | 1.80 |
| S F Metz | 94 | 45.5 | 1.84 |
| James L Swartz | 25 | 48.3 | 1.84 |

One hundred seventy eight cows completed lactation records of 305 days or less. Two of these cows produced over 900 lbs. of butterfat, 12 produced over 800 lbs., 19 produced over 700 lbs., 46 produced over 600 lbs., and 43 produced over 500 lbs.

The fifteen high cows are listed below. The owner's name and address, cow's name, pounds milk and pounds butterfat are given in order.

UNIPEL® 13-34-10

fertilizer can get your corn crop off to a super start:

It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly. Helps plants establish a good root system — the starting point for top yields. Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest.

This is the Starter Special that corn growers know from good experience. It's highly effective as a banded starter. And it's SAFE... no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs./acre.

How can we fit UNIPEL 13-34-10 into your corn fertility program?
