

**If you're out to beat anthracnose**

**That's what SARANAC AR is all about!**  
**in anthracnose country, it's the best alfalfa you can plant.**

Even in sticky, hot, humid weather when anthracnose is sweeping neighboring fields, Saranac AR goes right on producing as though anthracnose had never been heard of.

It's bred for your kind of land and your kind of weather. Bred to meet your highest goals . . . even when ordinary alfalfas are curling over and turning yellow.

Saranac AR meets hard winters and bacterial wilt head on . . . and comes out on top. It's bred for anthracnose resistance, fast re-

covery and long-lived stands. Pre-inoculated, of course. It's the only one to plant where anthracnose is a threat. After all, that's what Saranac AR is all about!
