CASE IS #1 IN 4-WHEEL DRIVE TRACTOR SALES

Here are a few of the reasons why!

Only Case gives you advanced design solid state selective steering

FRONT wheel steering
Automotive-style control
Ideal for row crops, most field work, road travel

COORDINATED steering
Rear wheels and front wheels are electronically coordinated for sharp, full power turning

CRAB steering counteracts implement drift on sidehills
Controls implement overlap
Makes four tracks (eight with duals) for maximum traction

REAR wheel steering with electronic rocker switch "fine-tuning" makes implement hook-ups much easier
Great for maneuvering around yards and buildings

If you don't think 4-way selective steering makes a difference you haven't test-driven a CASE 4 WD tractor.

1. On the go power-shift transmission = no power loss. Standard in all 4-wheel drive models.
2. PTO shaft to utilize full engine horsepower without a safety cut off switch.
3. The best visibility on the market - sit in our cab and see for yourself.
4. 3 point hitch with quick coupler.
5. More horsepower to the drawbar for your fuel dollar.
6. 2 wheel drive steering for corn planting, cultivating & row crop work.

Only From CASE:
FINGERTIP STEERING SELECTION
AND AMAZING
ELECTRONIC SENSING

Flick...flick...flick! As easily as you'd operate a light switch you can switch on-the-go from front to rear to coordinated to crab steering. When you switch to front steer, rear wheels center automatically.
