MARTIN METHANE And ETHANOL EQUIPMENT In Operation At The FARM MACHINERY EXPO

**Pennsylvania Farm Show Building, FEBRUARY 28, 29 and MARCH 1
BOOTHS 680-681, 674-675, Also Outside**

MARTIN ETHANOL SYSTEM

Automatically produces a 160 proof motor fuel (alcohol) from ground shelled corn for only 50¢ a gallon. This includes the corn, heating cost, enzymes and value of the dried mash containing 32% protein for feed.

The 50, 100, and 150 gallon a day size equipment is a self contained trailer type unit, completely assembled, wired, ready to operate. They are only eight feet wide and will be available with wheels to transport on the highway.

It's completely automatic, requiring no babysitting or manual labor to operate except filling the storage tank with grain and the hopper with enzymes.

The 5-gallon a day is designed for the hobbyist or the individual that only needs a few gallons a day for his car, van or pickup. It can be located indoors, requiring only a little attention in the morning and evening.

MARTIN METHANE SYSTEM

The digester produces methane gas from livestock manure which can be used to supply the heat for the Ethanol equipment, heat buildings, or operate an electric generator. The operating costs to make the methane gas is very low since it produces its own heat and requires very little maintenance. The value of the manure remains the same except the pH is slightly increased and it leaves the digester almost odorless, which is a real asset in most cases.

For more information on both systems come and see it operate at the Expo - watch for Open House on a farm at a later date.

**HONEY OF A HARVEST?
HANDLE IT WITH A HUNTER
SYSTEM... IT'S A HONEY!**

HEAVY-DUTY GALVANIZED ELEVATOR LEGS — DISTRIBUTORS — SPOUTING — CONVEYORS — GRAIN CLEANERS for a "Gentle Touch"

The Hunter line of grain handling equipment is built Bear-Strong for long dependable service. All parts are computer controlled during manufacturing for accurate matched fit. Elevator legs are available in 5 series sizes from 500 to 25,000 bu/hr; and, are all designed so that increased capacities within the limits of each series are attained by adding extra buckets at closer intervals — without changing the speed of head shafts. So, handle your harvest from wagons to dryer to storage with HUNTER... IT'S A HONEY!

Flowmaster Conveyor

IF IT'S HUNTER

GSI GRAIN BINS

MARTIN GRAIN DRYING SYSTEMS

Compare their unique features and advantages. Preserves grain quality, less shrinkage & stress cracks. Conserves energy, lower operating cost, from 3¢/bu. for 10 points. Both systems dry 35% moisture corn, requires no wet holding tank or babysitting. Both systems include a G.S.I. Drying Bin, in & out ladders, roof ladder, Cor-lok floor, steel floor supports, transition, fan & heater, ventilator cleaner, motorized spreader, unloading auger system with total enclosed motor, and freight to our warehouse.

MARTIN FLO-MOOR SYSTEM

2 STAGE CONT. or RECIRCULATING

\$6931

Includes Martin Electronic Moisture Control With Motor Starters.

- Drying capacity up to 12,600 bu./day
- 15 to 36 ft. diameter bins.
- Operating temperature adjustable 90° to 160°
- Add wet grain as fast as you harvest. Large storage capacity for fast unloading.
- Twin tapered sweep augers unload faster
- Extra heavy gear box assures trouble free operation
- Automatic grain level shut-off
- Grain Cleaner removes trash for better drying

MARTIN LOW-TEMP SYSTEM

Batch With
Low Temp. Control

\$3825

Stirring Equip.
Option

- Drying Cap. Up to 6400 Bu. Per Day.
- 15 to 48 ft. diameter bins
- The only system with gas heat (up to 30°) backup to prevent spoilage.
- The Martin Low-Temp Control monitors and automatically controls the temperature and the humidity. The thermometer, hygrometer and monometer display operating conditions, thus eliminates all guesswork in the easy operating management.
- Built-in safety controls assure trouble free operation.
- It operates automatically around the clock in sunshine or rain, heat or cold, without any babysitting or readjustments
