evel-action discs from John Deere

Farm Business News

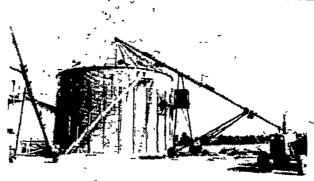

Leon E. Martin of Agri-Equipment, Inc., R4 Ephrata, PA, received an appreciation certificate from Chore-Time Equipment, Inc., Milford, Indiana, for serving on the company's 1979 Distributor Advis ry Committee. Presenting the certificate at Cho. e-Time's sales meeting in South Bend, Indiana, is Forrest Ramser, right, Senior Vice President of Chore-Time.

Nine John Deere Level-Action disks with many to area farmers. The 200 and 300 Series Disks feature an exclusive new Dura-Flex gang bearing as standard

equipment. This bearing has three extra-long flexible lips weight and width com- (see photo) that maintain binations are being offered contact with the inner race of the bearing yet resist

This continuous in-bin dryer from the Mathews Company has been designed to eliminate the most common problems found in other in-bin dryers currently on the market. In addition, it has proven high capacity results at low per bushel costs, and it has energysaving features necessary for profitable operations.

Patents are pending on the unique design of the Drybine system. As wet grain enters the top of the bin, it enters the drying section as harvested with no need for a wet holding bin. The upper drying chamber holds up to 2250 bushels of wet grain at a depth of up to four feet. Every seven minutes a continuous flow auger makes a complete revolution around the upper drying floor, drawing the dried grain into the lower cooling chamber. Outside air is

warranty. This warranty wear. The wide, fourth lipe also --works with an extended

drawn in at the bottom of the

cooling chamber. As the cool

air comes in contact with the

dried grain, the air increases

in temperature and rises,

helping to dry the grain on

The bin has a drying

capacity of 355 bushels an

hour. The drying process is

fast, while the cooling

process is slow, eliminating

stress cracks and damage

caused by fast cooling. The

process is very similar to

inches to 15 feet 8 inches. The two and three section 235 disk reaches from 17 feet one inch to 25 feed seven inches. The 215 and 235 are available with 74- or 9-inch blades spacings.

The heavyweight 300 Series includes the 315,335, and 375 level-action disks. Each features easy crank leveling, combination scrapers, new bearings with cast housing, heavy-duty gang components, and a choice of nine or eleven

blade spacing.
The 315 Rigid comes in widths from 12 feet 2 inches to 15 feed 8 inches. Weight per blade range is 120 to 150

A SERVICE FOR THE **FARMERS OF** PENNSYLVANIA WHOSE TIME HAS COME

ENVIRO-C, P.O. Box 49, Middletown, PA 17057

An Open Letter to the Farmers and other Property Owners in Pennsylvania.

Do you feel that you have been unjustly exploited by the public utilities and big business?

Vague or undefined easements across your property for highlines, oli & gas pipelines, underground cables etc. Unfair crop damage settlements, loss of use of your land during construction or repair of

Loss of precious top soil, the loss of which is not taken into account by either the utility or the contractor on the job. Fouling of streams and water ways by failure of the contractor to meet specifications set up by the Department of Environmental Resources.

Damage claims that are costly and important to you, but in most cases to small to be profitable to turn over to an attorney.

Contact Enviro-C land management-equitable damage settlement,

equitable fee for handling your claims from beginning of work till

Legal consultation included if needed, why be exploited without recourse at a reasonable cost. Contact Enviro-C P.O. Box 49, Middletown, Pa. 17057 Phone: 717-944-4212
