USDA cancels paid diversion for 1980 feed grain crops

WASHINGTON, D.C. — Secretary of Agriculture Bob Bergland last Friday announced the U.S. Department of Agriculture will not institute a paid land diversion program for the 1980 crops of wheat, corn and other feed grains.

He said the decision was based on prospects for continued growth in the world consumption requirement for these crops. "Our grain exports will be at record levels this year and will continue to grow in the future," Bergland said.

"While U.S. producers enjoyed record large production in 1979-80, world production of grain actually declined. This has boosted demand for U.S. crops," Bergland said.

"According to our estimates, we are expecting U.S. feed grain exports to reach a record 68 million tons in this marketing year and U.S. wheat exports to total 36 million tons—also a record amount."

"Obviously, we cannot

make any precise estimates of what 1980 world feed grain production will be but we know world grain demand will continue to grow. As long as we have adequate supplies, we can expect our exports to continue to increase. World grain stocks are declining this year and prices are higher than a year ago," Bergland said. "Stocks are likely to decline again in 1980-81," he said.

"The actions the administration took in January to suspend shipments of agricultural products to the Soviet Union above the eight million tons allowed under the U.S.-USSR Grains Supply Agreement have not fundamentally altered the long-range supply-demand picture for U.S. agriculture," Bergland said.

Swedes may be the world's leading apartment-dwellers. Two out of every three of Sweden's 8,273,000 people live in apartments, the National Geographic Society says.

Lipp.

For Liquid Manure Storage.

Unique construction methods mean Lipp builds unique manure tanks—in fact, the strongest tank on the market today

We roll our tanks upward on location from coils of steel and seal the coil edges with a unique double fold lock seam. The result is a boltless, smooth inner wall tank in 12 to 90 foot diameters and up to 900 000 gallon capacities. Interiors can be epoxy or Black Klad with aluminized or galvanized exteriors. And construction is quick.

We're Lipp. We're different and we're better. Storage is our specialty. Call or write today and get more details on the strongest manure tank available.
