

From Bou-Matic Technology . . .

BOU-MATIC IS THE ONLY COMPANY THAT HAS DONE EXTENSIVE RESEARCH TO GIVE YOU THE MOST FOR YOUR MONEY IN BETTER MILKING.

THE AUTOMATED MILKING SYSTEMS

LET US SHOW YOU WHAT BETTER MILKING MEANS...

- ★ Better Milking means healthier udders
- ★ Better Milking means a better let down
- ★ Better Milking means a better milkout
- ★ Better Milking means higher butterfat test
- ★ Better Milking means more gentle milking at teat end

THINKING OF A PARLOR, PIPELINE OR UPDATING YOUR PRESENT SYSTEM? BOU-MATIC HAS THE TECHNOLOGY YOU'RE LOOKING FOR.

With our trained service technicians and the latest in testing equipment - **WE CAN SERVE YOU BETTER**

- ★ Better Milking means a Vented stretch Bore Liner
- ★ Better Milking means alternating pulsation for better massaging
- ★ Better Milking means a Lower Vacuum

Better milking means more Profit which is yours.

This is what Bou-Matic will do for you. Give us a call or drop us a line. We will be glad to have our Salesman give you a demonstration on better milking.

★ **24 HOUR REFRIGERATION SERVICE - WORK GUARANTEED** ★

THINKING . . . OF BUYING A MILK TANK? DON'T DELAY! - CONSIDER TEMP-MATIC by Dari-Kool
The Tank with Features no other tank can offer

WOULD YOU LIKE A TEMP-MATIC® SOLID STATE RECORDER/CONTROLLER IN YOUR MILK HOUSE?

Pump-shroud shown removed for detail

Featuring:

- Built-in recorder.
- No Problems with Interval times.
- Interval timer agitates milk 4 different times in one hour.
- Built-in warning system - A horn or light warning signal is given when milk temperature rises two degrees or when milk temperature drops to 34 degrees.
- Built-in automatic washer.
- Milk agitates 1½ minutes out of every 15 minutes.
- Automatic washer is built in.
- Full flood refrigeration system
- Can operate the tank manually in time of emergency.

Features:

- Temp-Matic shows the temperature and records it every hour.
- Identification light signals when the temperature being monitored rises above 45°, Falls below 34°, or when the controller is switched off.
- Solid-state six-cycle washing and sanitizing assures dependable, complete cleaning of the tank interior.

Letters To The Editor

Dear Editor:

I would respectfully ask for the opportunity to comment on some of the statements in your March 1 issue, on the Expo tractor pull.

I personally am aware of four large tractor pulling sleds within the state, with the Franklin County sled being one of the three larger, three-axle types. The sled which was designed and contracted for by our club in late 1975 was, to our knowledge, the very first of this type built anywhere in the world. We are naturally very proud of that fact—especially since it embodies many innovations new to sled building at that time. Some of these features are now in fact required of all sleds used at National Tractor Pulling Association pulls.

I do not concede that any of these three-axle sleds is superior to any other, since dimensions, weights, etc., are all relatively similar. For instance, while we cannot get the skid on our sled to float in the air a garden tractor did make a full pull with it at the 1977 Gratz fair. The sled was not transferring weight, obviously, and another tractor nudged the sled to start it rolling.

Total weight of the sled is over 58,000 pounds; maximum transfer to skidplate is 42,500 pounds. I know of three other sleds of this type here in the Eastern part of the nation, but outside Pennsylvania.

Our club was particularly happy to see stock tractors pulling at Expo '80, as we proposed the first stock rules to our state pulling association. Incidentally, two of the three classes were won by our members.

Respectfully,
Eugene Sellers,
Northeast Pa. Tractor Pulling Club
Trout Run

Dear Editor:

As you may know the National Beef Research and Educational Act has failed to achieve an affirmative vote. On a State and National basis the majority of voters failed to approve the Beeferendum effort.

However, the industry debate did bring to the forefront issues that are a challenge to cattle producers and to consumers. Consumers are spending a smaller percentage of their income on beef than ever before. The debate highlighted such problems as "Beef causes cancer", "Beef causes heart disease", and the increasing use of Beef substitutes.

The Beeferendum effort helped the consumer benefit from more information on the nutritional value of beef and more facts countering the food faddist push of the vegetarian craze. The farmer-producer gained needed information on the extremes of the cattle cycle and new ways to expand his market.

For the industry these needs are immediate and the Beeferendum effort may have sown "seeds of ideas" for a future harvest.

To those who helped with their time, energy, and finances, I say, "thank you." The Pennsylvania cattle industry owes you a debt of gratitude.

To those who felt it necessary to distort facts and promote misleading suggestions, I am sure their lives and businesses will reap the implications of their efforts.

To one and all of my fellow cattle producers I offer my hand in friendship and trust our trails will cross many times as we strive to improve our industry together.

H.H. Stambaugh
Chairman
Pennsylvania Beeferendum
Green Park
