

Group to discuss cereal products

WASHINGTON, D.C. — A key committee of a 117-nation international food grain standards group will meet in Washington next month to discuss standards for cereals and cereal products.

Leland E. Bartelt, administrator of the U.S. Department of Agriculture's Federal Grain Inspection Service, said the worldwide group—the Codex Alimentarius Commission—will meet March 24-28 in the

main conference room of the U.S. Department of State.

Bartelt said the agenda includes consideration of proposed standards for wheat flour, corn, and rice, as well as a discussion of the committee's work plans.

"The committee will assess the need for and, if found necessary, develop worldwide standards for cereals and cereal products," Bartelt said.

"The United States is vitally interested in the work

of this committee," he said. "Cereals and cereal products are extremely important commodities exported from the U.S. We need to assure that the interests and needs of grain producers, handlers, processors, and consumers in this nation are considered."

Robert W. Weik of the Food and Drug Administration is the U.S. delegate and James L. Driscoll, director of the

FGIS standardization division, is an alternate.

An advisory group to assist the U.S. delegation will be named soon.

Since the size of the U.S. delegation will be limited, Driscoll said, a broadly based advisory group will be needed to represent all U.S. interests involved with the production and marketing of grain and grain products.

The commission, headquartered in Rome, Italy, is expected to provide

discussion papers for the meeting within a few days, Driscoll said. He said these documents will be distributed to interested groups as soon as they are received.

"A meeting to discuss these papers is planned to obtain information needed to develop a U.S. position on the issues," Driscoll said. "Written comments from those unable to attend the meeting also are welcome."

Copies of the agenda and background papers can be obtained from James L. Driscoll, Director, Stan-

dardization Division, FGIS/USDA, Richards-Gebaur Air Force Base, Bldg. 221, Grandview, Mo. 64030, telephone 816/348-2861.

That's the Difference
Someone once introduced Ed Wynn to the hostess at a gathering
"That is Ed Wynn, who is not such a fool as he looks"
"That's right," replied the comedienne, "that's the great difference between me and my friend"

All New HR Series

Oil Cooled Jacket

OIL COOLED

AIR COOLED

WATER COOLED

General Features:

- Integrally cast cylinders with inserted and removable wet type cylinder liners
- Light hypereutectic alloy pistons
- Extra-resistant steel connecting rods alloyed with special alloy head bearings
- Surface hardened steel crankshaft
- Drop-forged, casehardened and tempered steel camshaft
- Anti-friction cast-iron tappets alloyed
- Cast-iron tunnel type crankcase
- Rotary injection pump with mechanical governor

- Force-feed lubrication with built-in circuit and lobe type pump
- Diaphragm pump feed
- Oil and fuel filters with integral type element.

Special structure and patented engine with consequent increases in performance and easier operation with low weight/output ratio low smoke emissions.

Engine based on a design "modulus" formula which allows a maximum parts standardization and interchangeability.
