Automatic

ELECTRIC FEED PROCESSOR

(Automation Mill)

Process and blend 3 or more ingredients at one time!

(1) Control center (Type III timer system) predetermines and records amount of feed grain (2) Bin Switch regulates input auger, automatically controls grain level in hopper, (not visible); (3) Automatic scale meters preset amount of grain through roller mill, operates automatically and continuously without power; (4) Automatic Roller mill with fast-roll attachment rolls grain; (5) Dial-controlled variable speed augers in electronic meter let you add protein, mineral or medication into mixing auger; (6) Mixing auger mixes and delivers processed feed to take-away auger. Supply auger and mill processed preset amount of grain, (7) Accessory hopper with flow switch

Note: The Automatic Dump Scale and feed metering units may be gravity fed from overhead bins or hoppers. Flow-control switches are required if input augers are used in place of gravity flow

EAR CORN UNIT

Automatic's ear corn unit handles wet, shucky and even frozen ear corn. The crusher unit shreds the cob followed by rollers that crack the corn, producing a flaky, dust-free feed for greater digestibility. The hydraulically driven intake auger swings to the rear for transport and may be operated at any angle from rear to side

Dust-free rolled grain is more palatable, easier to digest, eliminates wheezing and many digestive disorders.

Big 11" tilting discharge auger with 10 ft reach swings down for slant or horizontal delivery

Hydraulic-driven intake auger swings to rear for transport position. May be operated at any angle from rear to side
