Gestation

ventilation . . .

Keep animals comfortable, and you keep them far more thrifty and far more profitable. Chore-me's Advanced Air Systems approach combines controlled air lets with the finest variable speed and single speed fans and other components. They're fitted to your specific building. The result is year-around, day-in and day-out comfort for your animals.

sow feeding . . .

Taking gestating sows out of the "maddening crowd" and putting them into their own individual stalls with a Chore-Time feeding system is the way to bigger litters, better litters, more litters from each sow, and more money for you to keep. Farmers can get back \$16 or more for every dollar invested in a Chore-Time Sow Feeding System.
