Pork producers call for swine fever research

WASHINGTON, D.C. -The National Pork Producers Council has called for increased funding for research on African Swine Fever and other swine industry concerns Ritchie Jordan, NPPC Legislative Committee chairman. testified during hearings on the 1981 federal budget before the U.S. House and Senate Appropriations Committees Monday and Tuesday.

Jordan asked that an additional one million dollars be directed to the Animal and Plant Health Inspection Service for increased garbage feeding surveillance and disease

Rovster

diagnosis. He asked that this redirected to the most effort to control ASF be concentrated in high risk areas such as ship ports and international airports.

"ASF is certainly a disease that we are very concerned about. I feel it is no exaggeration that this million spent now could save billions in the future," Jordan said The NPPC also asked for \$600,000 in additional funding for other research on ASF

In his testimony Jordan explained the National Pork Producers Council does not suggest increasing the budget to cover research in these austere times, but rather that funds be

productive programs

David Meisinger, NPPC's Director of Research, said the estimated return on investment in swine research is about 52 percent.

"This is higher than any other species of livestock and is much higher than most manufacturing firms I think this just emphasizes the productive nature of these programs," he explained.

Jordan also urged funding for a comprehensive review of the need for nitrite in food processing, the hazards of eliminating it from food and the economic impact of banning it.

TO SERVE YOU BETTER

Support for funding unbiased research on the possible relationship between diet and coronary heart disease was expressed by Jordan. Similar research was also proposed on

nutritional labeling, with a moratorium on further changes in the regulations until conclusive results are known

During his testimony. Jordan also advocated full funding of the Roman L Hruska U.S. Meat Animal Research Center at Clay

Center, Nebraska, increased

funding of cooperative

research on animal health and pilot project funds for the development of a comprehensive swine record system by the extension service.

Lancaster Co. Farm Women

Executive Board meets

The Executive Board of the Society of Farm Women of Lancaster County met Tuesday at the home of Kathryn Wagner,

Quarryville. State president, Helen

Hess, installed Joan Hershey

as 2nd vice-president for the county and Liz Heistand. president for the new Society

Joan Hershey announced a collector's spoon with the Farm Women insignia will be for sale along with the jewelry.

The League of Womens Voters and ARCO issued an invitation to members of Farm Women to participate in a free car-care clinic. Inhand instructions on maintenance and trouble shooting enabling women to help themselves will be presented. Dates and locations will be announced

Hospice of Lancaster County, a program for the terminally ill and their families, was voted to be the County Project for 1980. Contributions should be sent to Audrey Myer, county treasurer.

Mary Alice Fyock presented the suggestions of her committee for a memorial for Mary Alice Gregory. After discussion, it was decided to purchase a clock for the Lititz Public Library.

The next meeting of the Executive Board will be held June 3

CALL **DON LOHR** For Information

The Banvel early lay-by program works

1 Apply pre-emergence herbicide to control grasses

2 Apply Banvel before corn is more than 5 inches

Result: Banvel early lay-by controls broadleaf weeds when weed control is most needed

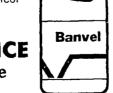

And you probably won't have to go back into the field till harvest

Call about the Banvel herbicide 2step overlay program from Velsicol

Before using any pesticide read the label
