

**THE SUPER AUGER SYSTEM FOR HOGS, DAIRY & POULTRY**

**Genuine Flex Auger: Our Original "Coreless" Auger Concept Is Often Copied — Except For The Quality!**

If it doesn't say "FLEX-AUGER" you're not going to get the benefits that only FLEX-AUGER Feed Delivery Systems can give. Since Chore-Time first invented the "coreless" auger principle about 20 years ago, others have copied the patented principle. But none have gone to the expense or trouble of imitating all the quality features and constant improvements that have gone into FLEX-AUGER year by year.

One of those quality differences is the spring steel auger itself. It takes just the right properties of steel, plus the special manufacturing know-how, to end up with the very flexible, yet long-wearing properties that you get with FLEX-AUGER.

three capacities — to meet any need you have

FLEX-AUGER® MODEL	Model 50	Model 75	Model 90
Capacity (lbs./minute @ 40 lbs. of feed per cubic foot)	20	50	100

**SPECIAL FEATURES**

- It's a study in simplicity. There are no corners, gears, connections, or pins to cause excess friction and wear out. This, plus low weight of the centerless auger which floats in the tube, means it consumes less power.
- Closed auger tube means feed stays fresher, free of insect or rodent contamination.
- Because the tube is essentially sealed, it can be used outdoors as well as indoors.
- Less space is required to mount FLEX-AUGER, compared with other systems. It simply hangs from the rafters or ceiling by chains provided.
- It's versatile. It adapts to various types of feeds, nearly any building layout.

FLEX-AUGER — it has earned its reputation as "the best way ever devised to deliver feed!"

**Highly Versatile, long lasting, efficient user of electric energy**

**THE SUPERAUGER SYSTEM FOR HOGS, DAIRY & POULTRY!**

**New CHORE-TIME High Moisture Corn Delivery System**

...yes, now there's a flex-auger for high moisture corn.

Now, Chore-Time has successfully developed a FLEX-AUGER system to handle corn up to 27% moisture. You can now take advantage of the cost and energy saving of high moisture corn without having to re-invest this money and energy in feed handling setup. The system includes stainless steel bin boot and oversize auger tube with smaller auger.

**Completely Galvanized Weather-proof Bins**

The feed bin is the heart of any feeding system. If it fails, the system fails. That's why we put so much quality into our complete line of bulk feed bins - starting with the complete galvanizing of all bin parts, even the legs and braces.
