Soybean growers ask assurance there will be no reserve

ST. LOUIS, Mo. - The American Association Monday urged Secretary of Agriculture Bob Bergland to take immediate action to use foreign food assistance programs to move any soybeans purchased by the Commodity Credit Corporation.

Such a move, said ASA officials, would assure the soybeans and soybean products purchased by CCC to offset the recent resale of soybean contract rights, purchased after the Soviet embargo, will not hold down market prices in the future.

"It appears that USDA Soybean now intends to move ahead with plans to purchase from 10 to 15 million bushels of soybeans from farmers and country elevator operators in the next few weeks," said ASA President Allan Aves in a letter to Bergland.

> "ASA does not quarrel with the contention that such purchases will stimulate market prices, but there is little doubt that future sales on the domestic market from such reserves would have a

dampening effect on soybean prices."

Aves pointed out that ASA has always opposed a federally held reserve on the basis that such reserves overhang the market and interfere with the operation of the free market system. Farmers and the grain industry have always maintained adequate grain stocks and are prepared to do so in the future, he said.

"Any soybeans or soybean products purchased by the Commodity Credit Cor-

poration should be isolated from the domestic market and should be used only in foreign food assistance programs under the Food for Peace program (PL 480) or for resale under the intermediate term credit program authorized under the Agricultural Trade Act of 1978," Aves said.

"These restrictions will assure that the soybeans and soybean products purchased by CCC now will not hold down market prices in the future," he concluded

Bureau forms economics division

PARK RIDGE, II. -American Farm Bureau Federation President, Robert B. Delano, announced Tuesday the formation of an economic research division. John K. Hosemann was named senior economist to head up the new AFBF unit.

Hosemann, a native of Mississippi, has a masters degree in agricultural economics from Mississippi State University and did doctoral work at Virginia Polytechnic Institute. He joined the AFBF staff in 1973 and for the past two years has worked as research economist assisting the chief economist, W.H. "Gene" Hamilton, who retired April 1 after 40 years of Farm Bureau service.

The economic research division will be responsible for expanding the federation's economic research capability and will serve as

resource for the organization on technical economic aspects of public policy issues and discussions.

Other staff members of the new division are Ross C. Korves, research economist, and Sue Amigoni, research sible for expanding Farm AFBF Research Founda-

Ralph L Innerst

service in agricultural outlook and policy analyses. Amigoni is in charge of the division's reference materials, agricultural data and general files.

Hosemann's new responsibility will also include assistant. Korves is respon- research projects for the Bureau's use of the Wharton tion, according to Delano.
