CASE IS #1 IN 4-WHEEL DRIVE TRACTOR SALES

Only from CASE: FINGERTIP
STEERING SELECTION AND AMAZING
ELECTRONIC SENSING

Flick flick flick! As easily as you'd operate a light switch you can switch on-the-go from front to rear to coordinated to crab steering. When you switch to front steer, rear wheels center automatically.

Only Case gives you advanced design
solid state selective steering.

FRONT wheel steering
Automotive-style control
Ideal for row crops, most field work, road travel

COORDINATED steering
Rear wheels and front wheels are electronically coordinated for sharp, full power turning

CRAB steering counteracts drift on sidehills. Controls implement overlap Makes four tracks (eight with dual) for maximum traction

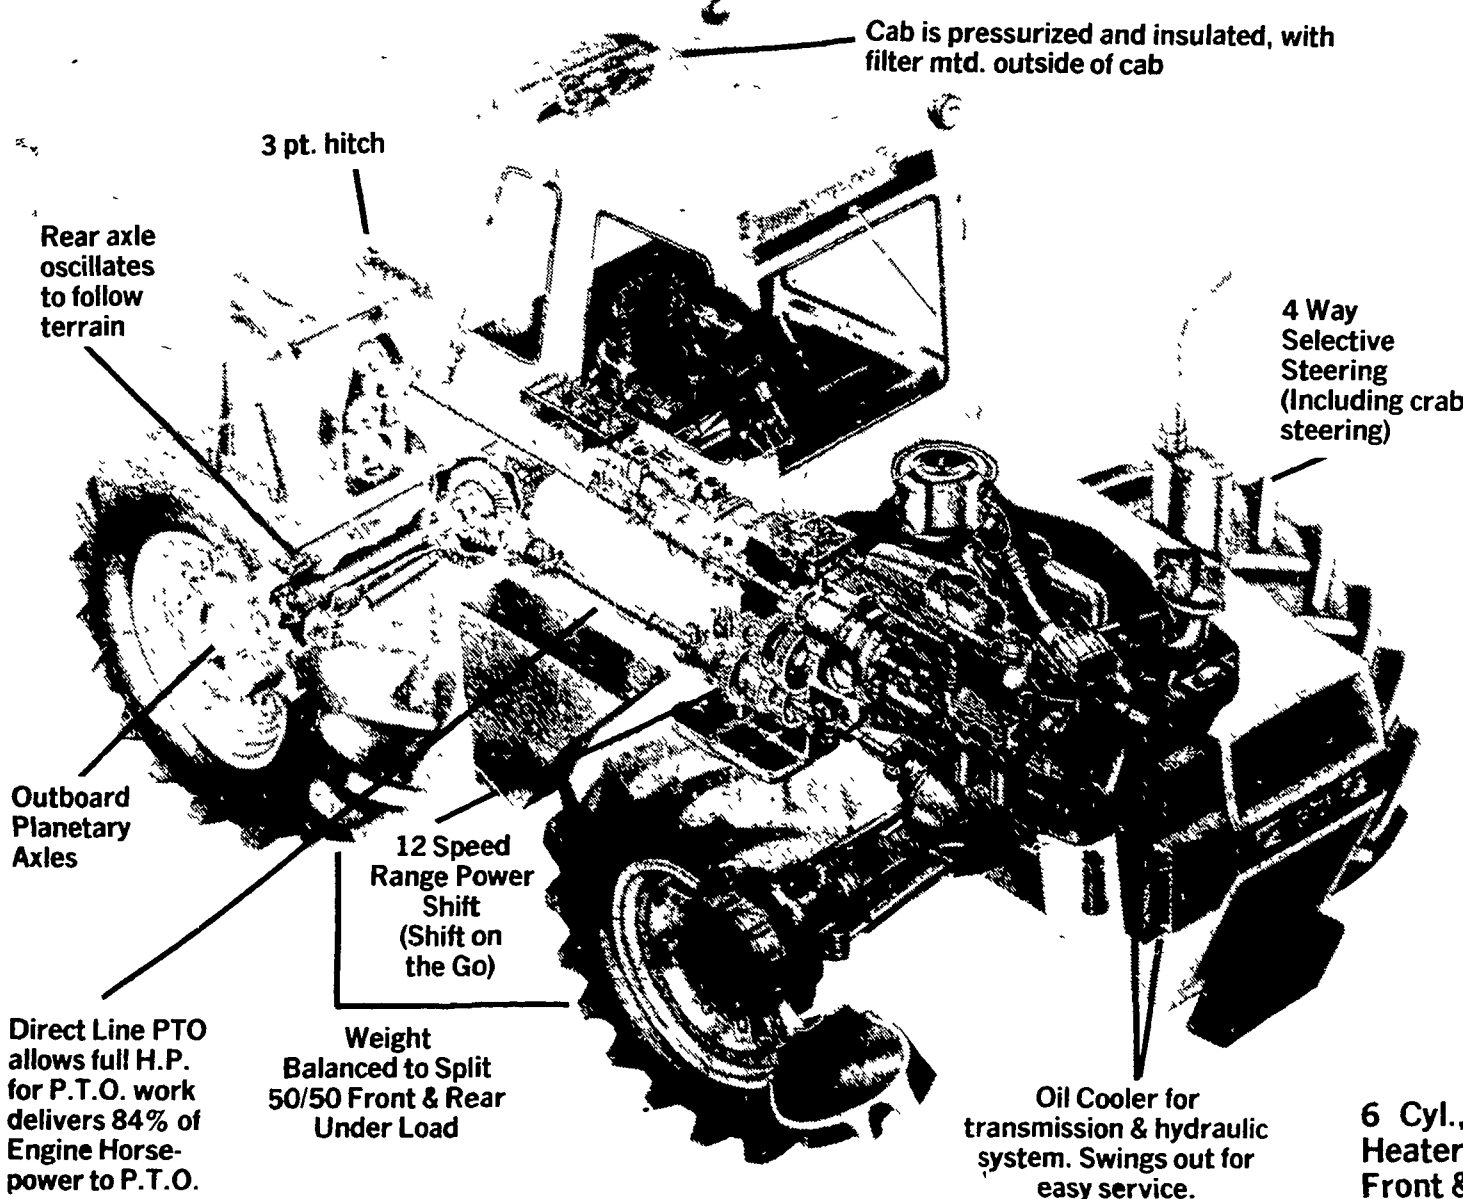

REAR wheel steering with electronic rocker switch "fine-tuning" makes implement hook-ups much easier Great for maneuvering around yards and buildings

If You Don't Think 4-way Selective Steering
Makes a Difference You Haven't Test Driven a CASE 4-WD Tractor

1. On the go power-shift transmission = no power loss. Standard in all 4-wheel drive models.
2. PTO shaft to utilize full engine horsepower without a safety cut off switch.
3. The best visibility on the market - sit in our cab and see for yourself.
4. 3 point hitch with quick coupler.
5. More horsepower to the drawbar for your fuel dollar.
6. 2 wheel drive steering for corn planting, cultivating & row crop work.
