

Kountry Kitchen

(Continued from Page A34)

mill, there will be 5 kitchens open for the tour. They are: Svea and Raymond Hoover. Here the farmhouse kitchen will be on display. Boris Thomas will give a demonstration at this stop on the food processor and its uses. To reach the Hoover kitchen, go East from Innerscourse toward White Horse. Turn left at Cambridge Road. Look for the first farm on the right that you can see with three white poles. Evelyn and George Rohrer. Here a large colonial kitchen which was recently refurbished will be open for inspection. A wood burning stove sits under a brick arch, providing heat as well as cooking area for the family. A microwave oven is built into the maple stained cabinets. Lucinda Landis, Lancaster County Dairy Princess will demonstrate making a cheese and butter spread. To reach the Rohrer farm, take Route 222 south approximately 3 miles from Willow Street. Turn left on

Lime Valley Road and continue about 1½ miles to Walnut Run Road. The farmhouse is on the left. Joy and Richard Haas. Here a wing built in 1974 houses an elegant kitchen, and much of the family time is spent here. A Kountry Kitchen Favorite, Dutch Pear Pie will be demonstrated here. Judy Mentzer will demonstrate the making of a French dessert. To reach the Haas kitchen, from Route 222 South, at Mylin's corner go west on Long Lane approximately ½ mile. Cross the New Danville Pike and the Haas live on the right. Theirs is the first house beyond the Cherry Hill Orchard sign. Joyce and Donald Hershey. In the kitchen of this active family, Lilli Ann Kopp will demonstrate a combination convertible and microwave oven. To reach the Hershey kitchen from Millersville, go past College and George Streets. Turn right onto Frederick Street and continue on the same

Tobacco blue mold warning given

LANCASTER — Lancaster County tobacco growers are urged to begin preventive fungicide sprays in their tobacco seedbeds as soon as the whole plant reaches the size of a dime.

"This will be an important

road (becomes Letort Road) for approximately 4 miles. After Letort Road go approximately 1 mile and turn onto Safe Harbor Road. Pass Masonville Mennonite Church to a crossroads. Go straight onto Coffee Street Road. Hershey's live on top of the hill the first place on the left. Look for College Street Acres on chicken house.

Sue and John Groff. The Groff family has refinished the 69 year old farmhouse kitchen, maintaining as much of the original flavor as possible. Here Carol Henkle will have a display of Pig Suede Flowers from dyed tanned pigskins. To reach their home, at Bridgeport, take the Lampeter Road toward Lampeter. Go approximately 2½ miles. The Groff farm is on the right approximately 1 block beyond Valette Drive on the left.

In addition to the morning tour, the group will have luncheon at Historic Strasburg Inn. Speaker in the afternoon will be Aletta Schadler who will speak on Your Food Dollar, Who Gets It and Where Do You Spend It. Tickets for the day long activities are available on a first-come first-serve basis. Send a self-addressed stamped envelope and make checks for \$8.50 payable to Lancaster County Farmers Association and mail to Velma Hershey, Rt. 1, Box 94, Kinzers, PA 17535.

first step to avoid the disaster county growers had last year from tobacco blue mold", said John O. Yocum, Agronomist and Tobacco Researcher at Penn State's Southeast Field Research Lab, Landisville, and Arnold G. Lueck, Agronomist and County Agricultural Agent, Lancaster.

The blue mold fungus disease is "almost certain" to attack plant beds this year, the agronomists believe. The disease has already been reported in late March in Florida and Georgia, moving northward as spring progresses. Most of the tobacco infected in those states were plants not protected by fungicides.

All plant growers should start spraying early with a fungicide containing ferbam, zineb or maneb in the seedbed. The first treatment

needs to be applied when plants are the size of a dime, repeated weekly, and continued until completion of transplanting to the field. In case of cool, rainy periods, the fungicide applications may need to be stepped up to twice weekly.

The following amounts of fungicide are needed for each gallon of water: ferbam, 5 level tablespoons, zineb 3 level tablespoons and maneb 1 level tablespoon. Growers with small plants (first three applications) are advised to use fungicides containing ferbam, a black material, and then switch to those containing zineb or maneb for remainder of applications. The zineb and maneb materials are more effective but may stunt growth of small plants slightly. All growers should read the fungicide label

carefully and apply according to directions.

"Plant bed protection is the way to go this year" advises Yocum and Lueck. Reports from Florida and Georgia indicate that growers who have followed the preventive plan correctly have experienced good control of blue mold with an abundant supply of healthy transplants.

Following extensive damage last year to most tobacco grown in the U.S. and Canada, a blue mold warning system has been established for this year. Tobacco growers will be informed whether the destructive disease is present in nearby states and what action local farmers may need to take as the growing season moves along.

N.Y. order to receive \$12.08 for March milk

NEW YORK, N.Y. — Dairy farmers supplying milk prices regulated under the New York-New Jersey marketing orders during March will be paid on the basis of a uniform price of \$12.08 per hundred pounds or 26.0 cents per quart.

Market Administrator Thomas A. Wilson, who announced March's price, also stated that the uniform farm price was \$12.24 per hundredweight in February 1980 and \$11.12 per hundredweight in March 1979. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive fund removed 20 cents per hundredweight from the dairy farmers' uniform price for March, for a total of \$1,843,252.37. Deductions for this fund will continue through June and will be returned in the August through November uniform price calculations.

The total amount of milk received from the 17,726 dairy farmers supplying the New York-New Jersey Marketing Area was 921,626,187 pounds during March 1980. This was almost 37.4 million pounds above last year. The gross value to dairy farmers for milk deliveries was \$114,024,060.66. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers utilized 399,151,876 pounds or 43.3 percent of the total

amount of milk for Class I. The Class I milk is used for fluid milk products such as homogenized, flavored, low-test, and skim milks. For March 1980, handlers paid \$13.62 per hundredweight, or 29.3 cents per quart, for this milk compared with \$12.80 a year ago.

The balance of the milk, 56.7 percent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid \$11.54 per hundredweight.

The uniform price is based on milk containing 3.5 percent butterfat. For March 1980, a differential of 15.0 cents was applied to the price for each one-tenth of one percent that the milk tested above or below the 3.5 percent standard.

All priced quoted are for bulk tank milk received within the 201-210 mile zone from New York City.

Group re-elects trustees

EPHRATA — Paul Green, of Farmers Supply Co. in Walkersville, MD, and Paul Grubb of Grubb Supply Co. in Elizabethtown, PA, were recently re-elected to three-year terms as trustees of the PennAg Industries Insurance Trust.

The Trust administers a group insurance plan for PennAg Industries Association members, their employees and families. PennAg is an agribusiness trade group with 500 members in Pennsylvania and neighboring states. Last year, the Trust

processed some 1,500 claims for its members and paid out nearly three-quarters of a million dollars.

Green is president of Farmers Supply Co., a Frederick County firm which he purchased in 1948. The company manufactures and sells feed in a three-county area.

Paul Grubb is president of Grubb Supply and has been in the feed business for more than half a century. His company today serves feed and fuel oil customers in a three-county area.
