

IN THE SPRINGTIME A YOUNG MAN'S FANCY TURNS... ...TO HAYMAKING!

WHICH DO YOU FANCY?

BEAT THE BALES

Compared to the high cost of baled hay, Harvestore processed haylage is like profit out of the Blue.

The haybaler. Equipment to bale doesn't come cheap. Plus all the gasoline, twine, repair bills and hard labor haybaling entails.

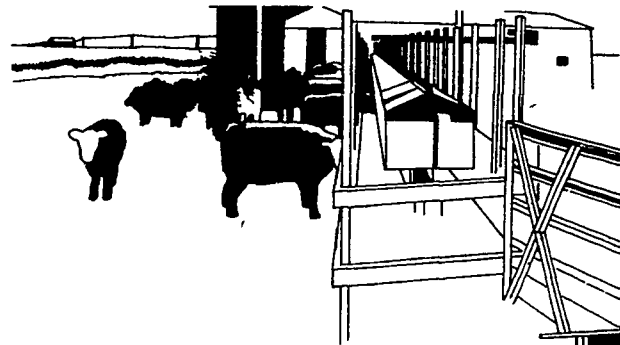

The crew. Labor is hard to find any-time to manhandle a hay crop from field to feeding.

Field losses. If your hay gets wet, you'll lose nutrients. And every time you handle a bale, leaves shatter.

WITH THE BLUES

Make short work of feeding with the Harvestore System.

You've bucked your last hay bale. Harvest crop as medium moisture haylage. Less time in the field means less chance of weather damage. No more haying crews. And storage and handling losses are virtually eliminated. Besides, Harvestore processed haylage is an extremely palatable feed.

Is the Harvestore System expensive? Not compared to baling hay!
