MF 640 Row Crop Planter

Massey-Ferguson's new 640 row crop planter uses air pressure to gently single out each seed

Seed selection discs provide extremely accurate plant populations in all kinds of soils, even with minimum tillage. A seed drop of only 9" (229 mm) adds to

planting accuracy by reducing bounce for uniform spacing in the row

Optional depth gauge wheels put every seed at the same depth for a uniform stand from one end of the field to the other. Double disc openers help stop plugging

to keep you on-the-move

Seed hoppers are 1 1/4 bushels translucent fiberglass for less refills and easy visibility of seed levels from the tractor seat

All of these features provide the new MF 640 with excellent planting efficiency at optimum

speeds so you get more seed in the ground per hour

Other features include a standard seed monitor, high-strength hydraulic markers and rugged roller chain drives

Personalized MF financing, parts, and service available.
