

Going that extra mile for better milk yields.

When your cows need feed, they need feed. They need it right away. And in the right combination. That's why the Pennfield delivery fleet packs so much versatility for its size. Compartmentalized trucks deliver feed from any of our four plants where more than 22,000 tons of grain and other ingredients are kept on hand ... ready for mixing at all times. By going this extra mile to deliver the right feed at the right time we can assure you that the Pennfield Computerized Total Ration Service is helping you to better milk yields. Here's how the service works:

1. We collect samples of your forage.
2. Then we evaluate the quality of your forages. We determine the total digestible nutrients. The fiber content. The protein content. The amount of carbohydrates.
3. The computer quickly spots any

nutrients lacking in the forage. For your milking cows. And for your dry cows. It immediately points out the overfeeding of nutrients. Underfeeding, too. Both, of course, may be different at different times of the year. And the printout will tell you what you need. And when.

4. Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows nutritional requirements.

Try the Pennfield Computerized Total Ration Service. For better milk yields. For better profits. There's no cost or obligation. Just phone us today at Pennfield Feeds. Local calls: Lancaster
