

CHORE-TIME**FLEX AUGER****THE SUPER AUGER SYSTEM
FOR HOGS, DAIRY & POULTRY**

NEW HIGH MOISTURE CORN DELIVERY SYSTEM

...Yes, Now There's A Flex-Auger For High Moisture Corn

Now, Chore-Time has successfully developed a FLEX-AUGER system to handle corn up to 27% moisture. You can now take advantage of the cost and energy saving of high moisture corn without having to re-invest this money and energy in feed handling setup. The system includes stainless steel bin boot and oversize auger tube with smaller auger.

CHORE-TIME[®] FLEX-AUGER[®] FEEDING SYSTEM

Your imagination is the limit when it comes to the feeding layout you can get with Chore-Time's patented FLEX-AUGER Feed Delivery System — it goes up, down, around, thru, over, or under. And it does it all without gears, corner cogs, or other energy-eating mechanisms. The secret is our sensible one-piece, continuous, spring-type "coreless" auger.

Typical feeding setup using new Chore-Time High Moisture Corn FLEX-AUGER System

- A. Auger and tube for the 3 basic sizes of FLEX-AUGER Auger comes in one continuous piece to fit your specific building
- B. Our 30° discharge angle single outlet boot with POSIFLOT[™] Feed Flow Control POSIFLO installs between bin and feed delivery boot. Prevents bridging and "ratholing" of feed. Boot also available in twin outlet version (as in diagram above)
- C. High-efficiency Power Unit mounts at end of FLEX-AUGER
- D. Outlet drops for all models of FLEX-AUGER have a shutoff
- E. Time clock is available to accurately program feeding times. System will also operate by control unit in one feeder

FLEX-AUGER[®] — proven components for flexibility in any feeding setup
