

# HARD WORKIN', TOUGH HAULIN' - that's OMAHA S

## Scissor & Telescopic HOISTS by OMAHA STANDARD

Introducing the NEW standard in hoists...

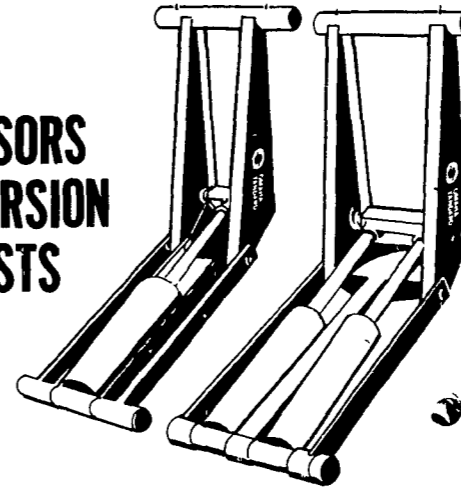

### FEATURES

- GREATER TORSIONAL STABILITY than other hoists on the market — handles uneven loads with no box twisting
- MORE LIFTING CAPACITY — advanced design means greater capacity than competition stabilizer-type hoists
- LONGER REACH than other "stabilized" hoists for far forward lift point
- LOW PROFILE — 7-5/8" mounting height eliminates cutting of body cross members
- HIGH POLISHED HARD-CHROMED TELESCOPIC CYLINDERS for durability and long wear
- HIGH PRESSURE FITTINGS AND HOSES mean greater safety and hoist longevity
- MAY BE MOUNTED IN EITHER DIRECTION for installation flexibility
- For body lengths 16 to 24 feet
- Quick, easy mounting
- 35° to 55° dump angle
- High pressure, positive displacement piston pump (gear pump/independent reservoir optional)
- Constructed from high-strength steel

All Omaha Standard hoists are sold with the Omaha Standard Body Prop and a pump lever control guard which comply with all existing state and federal O.S.H.A. regulations.

### SCISSORS CONVERSION HOISTS

Omaha Standard's single cylinder scissors hoists handle a range of bodies from 8' to 20' for loads from 4 to 25 tons. All hoists are double acting (except electric gear pump models.) Twin cylinder hoists will handle virtually all heavy grain loads under bodies from 14' to 24' for loads from 14 to 34 tons. Critical components of all Omaha Standard hoists are fabricated from special high-strength low-weight steel.

### Steel Grain Available in he and the extra Rugged one-piece

Check our body carefully 15 gauge steel on our steel body sides and ev on our large capacity 5 sizes are manufactured b roll forming. The result is side with maximum corn strength. There are no warping under stress

Specially designed bottom flange ensures grain tight seal
