

# MOVE GRAIN WITH AIR

- Save Money & Labor
- Utilize existing flat storage

We have PTO or self-powered units with a wide range of capacity.

Put your farm buildings to better use by storing grain in them. Buy a Neuero pneumatic grain conveying system to blow grain into, and vacuum grain out of, flat storage. One man can operate a Neuero system. Go anywhere with a Neuero... it's portable and versatile.

We can show you several more good reasons why a Neuero pneumatic grain handling system is your best investment. Let us demonstrate a model on your farm. Contact us this week for full details.

# ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

## DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

## Landisville sewing and crafts

LANDISVILLE — The Landisville Klassy Klippers Klub held its reorganizational meeting on June 4 at 6:30 p.m. at the Amos Herr Community Park in Landisville.

The following officers were elected: Nancy Mays, president; Amy Mays, vice-president; Suzanne Ayars, secretary; Sharon Landis, treasurer; Barbara Todd, news reporter. Brenda Brubaker, Rajm Singal and Marilyn Landis were elected game and song leaders.

Michelle Skiles, assistant home economist from the Lancaster County Extension Service, explained 4-H activities on the county level.

The next meeting will be held on June 12 from 9 a.m. to 12 noon at Centerville Junior High School in the home economics rooms for the sewing club and from 1 to 3 p.m. at 1212 Nissley Road, Lancaster, for the crafts club.

Project leaders are Mrs. Emily Nendza, Mrs. Gloria Grube, Mrs. Marion Harper, Mrs. Miriam Irwin, Mrs. Shirley Miller, Mrs. Arlene Miller, Mrs. Jane Witman, and Mrs. Joan Mays.

# "Harvestall Chillcuring works.

## It's this simple: Harvestall gives me a better product for less."

MERLE STOLTZFUS, Elverson, Pa.

"We've had our 48 foot Harvestall® bin for three seasons now and I really couldn't be much happier with it. Before the Harvestall® we used a batch dryer. Now it's for sale. We found you just can't batch dry corn as cheap as you can cure it with the Harvestall®. Last year I know it didn't cost more than 4¢ a bushel for Chillcuring®. Most of the corn went in at 26% to 27%. Some was over 30%, but we had no mold problem. As a matter of fact our test weight was up around 56 lbs. Some was as high as 58 lbs.

"The farmer really needs storage if he's going to be able to market his crop to his advantage. The Harvestall® system gives him not only storage, but eliminates the need for drying equipment and expensive fuel. Plus at harvest I can fill the bin as fast as the combine brings it in.

"It's really as simple as this: Harvestall® gives me a better product at less cost. So I'm not afraid to recommend the Harvestall because it works so well for me."

## The Harvestall Chillcuring System

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
