"Five years ago, when we chose the diesel engines to power our 750-acre irrigation system, fuel economy was what we were looking for and we looked at a lot of engines. The Deutz diesel was by far the best on that score. Other Deutz users told us they had cut their fuel bill by about 25 percent—we've done better than that. They also said the separate air-cooled cylinders on a Deutz are very easy to service. I couldn't tell you about that—we've never had to repair one"—Bill Bontrager, Operations Manager Estrella River Properties, Ltd., Paso Robles, Ca

failures, no cavitation, none of the problems liquid-cooled engines are heir to

Throughout the world, wherever the going is toughest, Deutz air-cooled diesels are going strong

Deutz engines consume less fuel simply because their advanced design makes them more efficient. They run at higher head temperatures and make better use of the fuel. They are more dependable, longer-running because of their solid quality and superior cooling system. About half the causes of downtime in liquid-cooled engines are attributable to breakdowns in the cooling system. In air-cooled Deutz diesels, there can be no freeze-ups or boil-overs, no broken water hoses, no water-pump
