

## Diesel converted to burn ethanol alcohol fuel

CHICAGO, Ill. — There is a project going to convert a diesel engine to burn farm-grade ethanol alcohol as an alternative fuel for tractors.

IH has loaned a new tractor, at 130 pto hp, plus extra engine manifolds and heads to the University of Illinois, Urbana-Champaign for the switch-over

Using the tractor and the extra manifolds and heads, U. of I officials will attempt to fine-tune the diesel engine to burn alcohol at maximum efficiency, which is essential for success, said Don Hunt, agricultural engineer.

"Our aim is to help our nation's farmers become

more energy independent of petroleum-based fuels by using on-the-farm produced fuel to power their tractors," said Raymond Cragle, director of the Illinois Experiment Station.

Cragle pointed out that alcohol as an engine fuel is used mainly as a fuel extender "Mixed with gasoline as gasohol, or even in the future with diesel fuel as diesohol, this fuel still is a blend and dependent upon petroleum-based sources. These sources are questionable to farmers today in terms of price and supply."

In tractors one possibility

is to burn low-proof alcohol produced from grain or other agricultural materials and wastes. Preliminary studies have shown that this can be successful in spark ignition tractors.

During the U of I Agronomy Field Day last fall an IH engine was converted to use straight ethanol showing that 180 proof or less alcohol produced power equivalent to that of gasoline.

Using pure alcohol in diesel engines, which largely have replaced the gasoline engines in agricultural equipment, presents ignition problems. Ethanol is not suited to compression

ignition, therefore, the engine must be converted. The research team must first convert a spark ignition operation. Fuel is introduced either by carburetion or fuel injection into the engine intake air stream.

"As a leading supplier of agricultural tractors and equipment to our nation's farmers, we are committed to increasing the fuel efficiency of our products. We are pleased to explore this opportunity that could lead

to helping our farmers become less dependent upon petroleum-based fuels," said Stanley F. Lancaster, vice president and general manager for IH's Agricultural Equipment Group.

Ag engineers are converting a diesel engine to burn farm-grade ethanol alcohol in hopes of giving farmers an alternative fuel for tractors. Working on the project is research team member Roy Brockett. IH loaned the U of I the tractor, a new Model 3388 at 130 pto hp, plus several engine manifolds and heads.

## VENTILATORS

NOW AVAILABLE IN:

- PRE-PAINTED COLORS
- GALVANIZED
- ALUMINUM

Custom Made  
Completely Assembled  
No Flashing Needed  
Over 20 Years  
Experience

PHONE: 717-354-4114

**L. M. MARTIN, INC.**

R.D. 3 Ephrata, PA 17522  
Rt. 322 in Hinkletown

- ROOFING • SIDING • SEAMLESS SPOUTING
- METAL STANDING SEAM ROOFING

## YOUR MILK QUALITY GUARDIAN...

**MUELLER**  
HiPerForm

Mueller HiPerForm® is the completely automatic milk cooling system for progressive dairymen. Durable HiPerForm Model "OH" and "MHL" Milk Coolers feature large-radius corners and smooth stainless steel welds for easy cleaning. Cooler capacities range from 300 to 6000 gallons. With the flip of a switch, Mueller-Matic® Automatic Washing System cleans the cooler interior with jet-spray wash and acidified rinse.

Ask us for details on HiPerForm milk coolers.

**USED TANKS**  
300 Gal. & Up

SALES & SERVICE

## TRI-STAR Trailers...

More Hauling Capacity for Less Money

### GRAIN

- Original taper-formed Goose-neck design - patented
- High Flotation Tires—10 ply, 12 x 16.5 (Go where others won't)
- 20-ton Twin Telescoping Hydraulic Cylinders (Guaranteed to raise and dump any grain load)
- 18" rear clearance when trailer is fully raised
- Bear Trap Hitch®—Laborsaving, one man hookup

### FLATBED

- Rugged 60" Steel Frame
- Original taper-formed Goose-neck design
- Lengths from 16' to 30'
- Tongue and groove pressure treated flooring

### LIVESTOCK

- Rugged Steel Frame Steel Front and Top
- Heavy Duty, Slipper-Spoon Suspension
- 8 ft wide hauling capacity
- Removable side and front panels for Extra ventilation
