

USDA calls for comments on 1981 wheat proposals

LEESPORT — Secretary of Agriculture Bob Bergland recently asked the public to comment by July 21 on provisions of the 1981 wheat program, according to a spokesperson for the Agricultural Stabilization and Conservation Service.

The Secretary said the Department is seeking comments on the amount of the national program acreage, the reduction from the previous year's harvested acreage required to guarantee established target price protection on the total 1981 planted acreage, whether there should be a set-aside and, if so, the extent of the set-aside.

Also, if a set-aside is required, should there be a limitation placed on planted acreage, and/or should there be a paid diversion program and, if so, the extent of such

a diversion and the level of payments.

The public is also being asked to comment on the loan and purchase level for 1981 crop wheat and whether the special wheat acreage grazing and hay program should be implemented.

Under new authorities granted under the Agricultural Adjustment Act of 1980, the Secretary may consider current cost of production estimates to determine 1981 target prices. In the past, changes in target prices were derived based upon a formula considering only prior year's costs.

Because of these new authorities, Bergland said, the Department is asking for comments on how the 1981 target price should be adjusted from 1980 levels and whether producers should be required to comply with

established farm normal crop acreage to be eligible for program benefits.

If a set-aside program is implemented, the Secretary has discretionary authority to adjust the target price to compensate producers for participating in such a program. Comments are requested on whether this authority should be used and the extent of any adjustment.

The public is asked to give input on related program provisions such as commodity eligibility, storage requirements, premiums and discounts, establishment of county rates and other provisions needed to carry out the loan and purchase program.

Most of these determinations for wheat are required to be made by the Secretary by August 15.

However, Bergland said he hopes he will be able to announce the 1981 program before that date.

In making the final decision, recommendations and views submitted by the public will be considered as will the best data available on world and U.S. crop conditions, production and consumption prospects.

Written comments must be received by July 21.

They should be sent to the Director, Production Adjustment Division, ASCS, USDA, Room 3630-S, P.O. Box 2415, Washington, D.C. 20013. All comments will be available for public inspection at the Director's office during regular business hours.
