

MOVE GRAIN WITH AIR

- Save Money & Labor
- Utilize existing flat storage

We have PTO or self-powered units with a wide range of capacity.

Put your farm buildings to better use by storing grain in them. Buy a Neuero pneumatic grain conveying system to blow grain into, and vacuum grain out of, flat storage. One man can operate a Neuero system. Go anywhere with a Neuero. It's portable and versatile.

We can show you several more good reasons why a Neuero pneumatic grain handling system is your best investment. Let us demonstrate a model on your farm. Contact us this week for full details.

ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

Maryland Angus Annual Field Day; Back Acres Angus; Mt. Airy, Maryland.

Keystone Stud Ram and Ewe Sale; Farm Show Building; Harrisburg.

Erie Dairy Goat Association doe show; Albion Fairgrounds.

"Harvestall Chillcuring works.

Clarence Harnish, Lampeter, Pa.

This was my first year with the Harvestall. When my corn was dried commercially last year it cost me 27¢ per bushel. With the Harvestall it didn't cost over 6¢ per bushel and the test weight was 58 to 59 lbs.

I'm pleased with the quality corn I get and I'm pleased with the savings. I would recommend the Harvestall system to farmers who are looking for storage or drying because it has done for me the job it was designed to do.

I get better quality corn for less cost."

The Harvestall Chillcuring System

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
