

## Sullivan County holds Dairy Month festivities

A cow milking contest was part of the Dairy Month activities recently in Dushore.

A parade held in Dushore during the afternoon Dairy Month activities brought over 700 people to the streets to celebrate. The parade was complete with 30 units and Mr. Cheese, a walking Agri-animal.

# LANCASTER COUNTY DAIRYMEN:

**IT'S A FACT:** chances are better than 9 out of 10 that your herd of slick, high-producing cows is infected with roundworms. Here are five more facts you should know about worms, the production losses they can cause, and how to help stop them with TBZ, the prefreshening cattle wormer.

**FACT 1—**Most wormy cows "look healthy" because they eat enough to feed the worms AND to keep themselves looking good. University, Extension and other scientists have proved over 90 percent of all cattle are wormy, *even in cold, northern climates*.

**FACT 2—**Worms can cut production, **even in top herds**, by as much as 400 to 500 pounds per head per lactation. . . shown in trials in Wisconsin, Vermont and other dairy states.

**FACT 3—**One out of four dairymen now worm routinely, and thousands

more are beginning every year.

**FACT 4—**Worming each cow with TBZ before she calves lets her begin lactation clean, and helps make peak production possible all through lactation.

**FACT 5—**TBZ is a one-dose, one-time worming treatment available in paste, bolus, suspension and pellet forms.

At the stanchion or in the calving pen, TBZ makes worming each cow as she freshens simple, easy, quick.
