

Manure Handling Equipment

Model 400 Manure Elevator

Here's a whole new concept in manure handling! When properly installed at and below the edge of a liquid tight manure holding area the Zook Model 400 elevator proves to be a simple and inexpensive way of handling manure.

* Now available with rubber bolted onto paddles for faster loading of liquids.

Installing the elevator below the holding area floor insures the best performance for removal of manure.

- Handles both liquid and semi solid manure
- Few moving parts require almost no maintenance
- Corrosion resistant high strength Corten steel construction
- Self lubricating bottom end bearings
