

ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

Neuro AIR/LEG GRAIN CONVEYORS

- Portable • Safer
- Less Labor • Save Money

Why spend thousands of dollars on installing a leg and auger system for grain handling, when a Neuro pneumatic conveying system will do the job far easier and for a lot less money?

In addition, a Neuro System is more gentle on your grain reducing breakage dramatically over augers and legs. You also gain versatility with a Neuro System because it's portable — move it anywhere, as opposed to fixed-location legs and augers. Get out of the dust — save your health — with a Neuro System! Let us show you the many advantages of our wide selection of PTO or self-powered models. Contact us this week for full details.

"Harvestall Chillcuring works.

It's this simple: Harvestall gives me a better product for less."

MERLE STOLTZFUS, Elverson, Pa.

"We've had our 48 foot Harvestall® bin for three seasons now and I really couldn't be much happier with it. Before the Harvestall® we used a batch dryer. Now it's for sale. We found you just can't batch dry corn as cheap as you can cure it with the Harvestall®. Last year I know it didn't cost more than 4¢ a bushel for Chillcuring®. Most of the corn went in at 26% to 27%. Some was over 30%, but we had no mold problem. As a matter of fact our test weight was up around 56 lbs. Some was as high as 58 lbs.

"The farmer really needs storage if he's going to be able to market his crop to his advantage. The Harvestall® system gives him not only storage, but eliminates the need for drying equipment and expensive fuel. Plus at harvest I can fill the bin as fast as the combine brings it in.

"It's really as simple as this: Harvestall® gives me a better product at less cost. So I'm not afraid to recommend the Harvestall because it works so well for me."

The Harvestall Chillcuring System

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
