

**"WE'RE GETTING THE QUALITY FEED FROM OUR HARVESTORE<sup>®</sup> THAT WE ALWAYS WANTED OUT OF OUR SILO!"**

F. Edwin Rohrer, Sr. & Son, F. Edwin Rohrer, Jr.  
Paradise, PA

The Rohrers made Haylage in their concrete silo for 8-10 years before buying their first HARVESTORE<sup>®</sup>.

Ed, Jr. says, "We had problems getting consistent delivery from our top unloader in Haylage. Also it was critical to get moisture right. We've seen mold along the edges of the silo. Haylage from HARVESTORE<sup>®</sup> structure looks and smells much better and we feed Haylage all year round. We don't make Haylage in the silo anymore."

Ed, Sr. says, "We really like the convenience of bottom unloading!" Ed adds also, "When I was considering my purchase, I looked at the resale of the 2070 structure."

The Rohrers are erecting a 2042 HARVESTORE<sup>®</sup> this summer for High Moisture Shelled Corn.
