BODMIN NU-PULSE SYSTEM

FOR PARLORS PIPELINES AND PAIL MILKERS — ONE CLAW FITS ALL
The "non-conventional milker" that establishes all new milker standards for the industry with low teat end vacuum (10" HG) (5/8" milker hose required)

The Ideal Bucket-Milker For The Amish Dairyman

Thinking About A New Milking Parlor, A Parlor Conversion or A New Round the Barn Pipeline Milker? Here're 10 Reasons Why You Should Compare Bodmin Before You Buy

- 1 Uses less energy
- 2 Uses less vacuum
- 3 Drop off eliminated
- 4 Better udder health
- 5 Less mastitis problems
- 6 Most simplified system on market today
- 7 5000 cow milkings per set of inflations
- 8 Same unit fits all systems
- 9 11% increase in milk production (over conventional systems)
- 10 Cows like to be milked with a Bodmin

Save Energy and get FREE HOT WATER

with the revolutionary **MUELLER FRE HEATER**

The Mueller Fre Heater* conserves energy and provides free hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS

Rather than using noisy dust creating fans with fragile dirt collecting air cooled condensers the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water.

A thermostatically controlled valve delivers approximately 140°F water to the storage tank.

In addition to the thermostatic valve a mixing valve is provided to permit prepping temperature water.

Thus the Fre Heater delivers two temperatures of water — prepping and washing.

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in milk cooling systems are related to the air cooled condenser.

The Fre-Heater eliminates these problems because

- There is no air cooled condenser
- The Fre Heater is installed indoors
- There are no noisy fans to fail
- The head pressure is very stable — assuring longer compressor life
- There are no cold weather starting problems plus

the Fre Heater conserves energy and produces Free Hot Water!

HOW MUCH HOT WATER CAN BE GENERATED?

There are many variables so this question cannot be answered directly however as a rule of thumb a Fre Heater operating on 60° F well water will produce a volume of approximately 140° F water similar to the amount of milk produced during a milking.

Manure Handling Equipment

Model 400 Manure Elevator

Here's a whole new concept in manure handling! When properly installed at and below the edge of a liquid tight manure holding area the Zook Model 400 elevator proves to be a simple and inexpensive way of handling manure.

* Now available with rubber bolted onto paddles for faster loading of liquids.

Installing the elevator below the holding area floor insures the best performance for removal of manure.

- Handles both liquid and semi-solid manure
- Few moving parts require almost no maintenance
- Corrosion resistant high strength Corten steel construction
- Self lubricating bottom end bearings
