

# Here's 1980 Summer Sire Summary

**LANCASTER** — The U.S. Department of Agriculture and the Dairy Herd Improvement Association have completed the Summer 1980 active AI sire summary listing.

Predicted Difference for dollars, the last and perhaps most important column, is based on a milk price of \$11.50 for 3.5 percent butterfat test

milk with a fat differential of 14.2 cents. This is the U.S. average price for last year, less average hauling charges.

Summaries were calculated on all bulls reported active by AI organizations as of July 23, 1980. Records in progress are included in all summaries.

Sires are listed by breed as follows:
