happen  
to you

prior to the RL-112.

The above photo shows an actual truck body wrecked by a tipover which was caused by uneven lifting of an off-center load. Although HARSH HOISTS® cannot guarantee that a truck equipped with a HARSH® RL-112 will never tip over, the engineered lifting stability of the RL-112 will greatly reduce this possibility.

IN AN ACTUAL TEST OF THE NEW HARSH RL-112 18,000lbs. of sand was loaded to one side of the truck. The picture on the left shows the actual load used. The picture on the right shows the sand unloading. Note there is very little bending or twisting of the truck body.

**HARSH® RIGID-SPECIFICATI**

| Cab to Trunnion | Box Length | Ov (In) |
|-----------------|------------|---------|
| 120"            | 18'        | 45      |
| 138"            | 18'        | 27      |
| 138"            | 20'        | 51      |
| 162"            | 20'        | 27      |
| 162"            | 22'        | 51      |
| 186"            | 22'        | 27      |
| 186"            | 24'        | 51      |
| 190"            | 24'        | 47      |

Mounting Length

### NEW FROM HARSH® HOIST FOR YOUR SMALL TRUCKS

### LOW PROFILE - O90

- Now a Hoist for 8' to 13'6" Body Lengths — TBEA Class C
