

Introducing the new Martin Scavenger... the one spreader for a two-spreader farm

When the manure hits the fan of a new Martin Scavenger you know you're seen all the spreading equipment you'll ever need. You get up to a 50 foot pattern of the most even manure coverage ever to fertilize a farm. And that's regardless of the kind of manure you load into it. Liquids, semi-solids, pen manure, most everything. Even frozen.

The Scavenger's large, specially-designed auger pulsates and spirals any kind of manure, throwing it against a unique 30-inch-wide

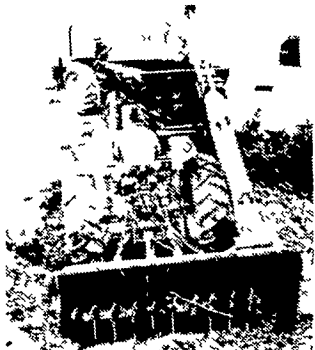

expeller reel. This technique enables the Scavenger to spread more kinds of manure in greater volume with less horsepower.

It's time you get all your manure together in the one spreader that's more effective than any two of the high-priced spreaders. The Martin Scavenger. Any way you look at it — return on investment, economy of operation — Scavenger measures up. It does the work of two spreaders for the price of one. Ask your Martin dealer about it today.

Martin Manufacturing, Inc.
841 Kutztown Road • Myerstown, PA 17067 •
