

ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

Neuero AIR/LEG GRAIN CONVEYORS

- Portable • Safer
- Less Labor • Save Money

Why spend thousands of dollars on installing a leg and auger system for grain handling, when a Neuero pneumatic conveying system will do the job far easier and for a lot less money?

In addition, a Neuero System is more gentle on your grain reducing breakage dramatically over augers and legs. You also gain versatility with a Neuero System because it's portable — move it anywhere, as opposed to fixed-location legs and augers. Get out of the dust — save your health — with a Neuero System! Let us show you the many advantages of our wide selection of PTO or self-powered models. Contact us this week for full details.

**"Harvestall
Chillcuring
works great.
I get top
quality corn
for
less than
I used
to pay for
shelling
alone."**

ANDY GLICK, Oley, Pa.

"I used to get my crib corn shelled for feeding my hogs. But since that cost around 8¢ a bushel even before hauling costs, I decided I'd be better off with storage. I went with the Harvestall and have never regretted it.

"I've put as high as 32% moisture corn in my Harvestall and you know, I've never had a mold problem."

"So I'm impressed with the Harvestall system and the quality corn I get with it. And I get it cured down for less than it used to cost just for shelling.

"I've recommended the Harvestall to my friends. I'm really happy with it."

**The Harvestall
Chillcuring System**

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
