

# Gitt Holstein takes grand at South Mountain Dairy Show

BY DEB SPAIN  
 ARENDSVILLE — Christine Gitt, R2 Littlestown was worn out but satisfied by 10:30 p.m. Friday evening at the close

of the Open and 4-H Dairy Show at the South Mountain Fair, Adams County. Christine had been busy since 6 p.m. exhibiting her Holsteins in the show ring.

Her efforts were well rewarded, however, Chris's big regal 3 yr. old "Penn-Gate Jetstar Queen" proudly wore the Senior Champion and Grand Champion rosettes as well as the first place ribbon for her class.

The Gitt's Penn-Gate herd collected an impressive list of awards by the end of the competition. Their two intermediate heifers won first and second places in their class, while first and second place in the Junior Yearling class were captured by two more Penn-Gate cows. "Penn-Gate Jetstar Vickie" and "Penn-Gate Raven Ace Teresa". And, Penn Gate's outstanding four year old "Janibo Dian Elevation" ranked ahead of the competitors in her class.

In numerous combinations, the Penn-Gate herd collected blue ribbons for Best Three Females, Senior Get of Sire, Best Uddered Cow (Penn-Gate Jetstar Queen), and Dairy Herd.

In the next barn, another family was busy hanging up ribbons and rosettes.

The Weimers of Weim-Sharr Farms, R2 New Oxford, make cattle a family affair. Sons Tom and Mike showed in several classes, Jennifer exhibited in the open show and the 4-H competition and other family members including a proud father, Stanley, were nearby to assist in the show ring.

Jennifer Weimer won the

## THE PATZ SOLUTION: Reliable Year-Round Feeding

You know the problems caused by hard packed and frozen silage. Patz gives you two solutions to the problem — the Model RD-790 ring-drive silo unloader and the Model 98B surface-drive silo unloader.

Both unloaders feature a double-hook gathering chain with hardened steel cutters and claws that rip through frozen and packed silage. When you push the button, you know you can count on a smooth feeding operation.

Evaluate our powered silo wall cutters. Spring tension holds 4 self-sharpening steel cutter blades in place to follow the curve of the silo wall. This keeps silage from building up along the walls, so you can be sure that you're getting all the feed where it belongs... in the feeder and not stuck to the walls.

The claws and cutters of the gathering chain deliver a steady flow of silage day after day.

Want to know more about the Patz system? See your Patz dealer. He'll show you Patz quality and reliability... two important words to a farmer like you.

Patz double-hook gathering chain features cutters and claws

Rotating steel blades keep the silo wall free of silage buildup (shown without guards)
