BENSALEM — If you like the Phillie Phanatic, you'll love the Pennsylvania Department of Agriculture's seven agri-animals. Be sure to see those seven lovable costumed characters — To-To Tomato, Eggatha, King Arthur Apple, PA Spuds, Corny Cornelius, Marton the Milk Carton and the Mushroom Munchkin — at the Pennsylvania Agricultural Foods Exposition at the Keystone Race Track in lower Bucks County October 3, 4 and 5 from 11 a.m. to 8 p.m. daily.

When a six-foot costumed character talks, children listen. The agri-animals are great entertainers with the kids as they hand out recipes

and samples of their products.

Each agri-animal has its own story to tell and each represents an important segment of Pennsylvania's diverse agricultural bounty. All of the farm commodities represented by the agri-animals are important to a well-balanced diet.

Eggatha, "Queen of Eggdom," represents Pennsylvania's economical, versatile and very nutritious egg. The Keystone State ranks third in the nation in the production of table eggs. Be sure to take a taste of her famous Egg Pick-up Drink!

To-To Tomato, a voluptuous red character, boasts that Pennsylvania is among the

top ten states for tomato production. Whether talking about green wrap tomatoes from the field or the bright red main ingredient in sauces made in our many food processing plants, To-To Tomato is proud of them all.

The bright red character with a crown on his head is, of course, King Arthur Apple. He represents the nutritious apples of Pennsylvania. One of his favorite questions is, "What is red, yellow and green and grows on trees?" The answer, a Pennsylvania apple. The commonwealth ranks fifth nationally in apple production.

Waving his six-shooter, PA Spuds tells children how great Pennsylvania's spuds really are. Pennsylvania ranks eighth in the production of fall potatoes. PA Spud's only problem is deciding how to cook his product, versatile as it is.

Corny Cornelius is truly outstanding in her field. This giant ear of corn, complete with corncob pipe, advocates the virtues of Pennsylvania corn. Although most of Pennsylvania's corn is grown for the dairy and livestock industry, Corny Cornelius favors delicious Pennsylvania sweet corn fresh from the field. Pennsylvania ranks sixth in the production of sweet corn. Marton the Milk Carton is

looking for a giant straw. The agri-animal is proud to boast about "nature's most perfect food." Pennsylvania is world famous for its dairy industry, which ranks second in ice cream and frozen dairy products and fifth in milk production.

The Mushroom Munchkin has an exciting story to tell about his commodity as well. How many other Pennsylvania farm products are grown UNDER ground? Pennsylvania products more mushrooms than any other state.

Pennsylvania agriculture is truly growing better, and the agri-animals have a lot to boast about. While they are geared for the kids, to help acquaint them with these fine products, many adults can be found sidling up to them too. Meet our agri-animals and get a taste for Pennsylvania agriculture.

The Foods Expo will also feature a farmers market and food booths with fresh farm foods, a day on the farm with livestock and farm demonstrations, dairy princesses and food queens, food demonstrations, a petting zoo and hayrides for the kids, food processors with Pennsylvania's finest prepared foods and bluegrass, country, ethnic and string bands each day. Admission and parking are free.

How to protect your home during a power blackout

A Kohler Powerhouse Generator with optional Emergency Power Kit (connection box and transfer switch) puts electricity directly into the circuitry of your home. Now you can power essentials like the furnace, refrigerator, freezer, sump pump, and water pump with power to spare for appliances and lights.

1. Powerhouse Generator.

Choose 3500 watt or 5000 watt Kohler Powerhouse generator with manual or electric start to power your home. Produces 120/240 volt electricity. Powered by long-life Kohler cast-iron engine.

2. Connection Box.

The Kohler weatherproof outdoor connection box accepts the power cord from the generator. Installed on the exterior of your home, it permits generator power to flow to the Transfer Switch.

3. Transfer Switch.

Kohler's safety interlock switch transfers the circuitry of your home from "normal" line power to the emergency power source — your generator. The switch permits line power and emergency power to enter the circuitry, but not both at the same time.
