MCMP's York dairymen told Holly looking better

BY JOYCE BUPP
Staff Correspondent

NEW PARK — Members of Maryland Cooperative Milk Producers District 7, York County, heard optimistic news Monday evening about the Holly milk plant.

President Herbert Wessel, Jr., told the dairymen who gathered for the dinner meeting at Centre Presbyterian Church that "Holly is operating in pretty good shape."

The Cumberland County butter and milk powder plant owned in partnership with Interstate Milk Producers of Southampton showed a profit for August of \$120,000.

The cooperative's August financial statements show a savings of over \$380,000, with \$245,000 of that provided by the membership retains. A total analysis of the financial picture shows MCMP nearly a half-million dollars ahead of where it was at district meeting time in 1979.

According to Wessel, the cooperative continues to study possible mergers with neighboring milk marketing groups, in accordance with a resolution to that effect voted earlier this year by the membership.

"The financial integrity of MCMP members must be maintained and services currently available must be maintained regardless of any potential merger possibilities," Wessel assured the York County farm group.

"We also want to maintain

Herbert Wessel, Jr.

a close contact with the hauling business. We will not give up those cooperative beliefs."

The Baltimore-based cooperative's president added that MCMP does not want, in any way, to jeopardize farmer investment in Holly or the future of the Holly plant.

Business manager Ralph Strook, in his update to members on the long range milk marketing picture, expressed concern that milk production is up 3.5 percent over last year. For the first time in many years, cow numbers have also turned upward, with current industry statistics showing one percent more milking animals now than a year ago.

"And that will create some supply problems," Strook warned the producers.

While the support levels will keep the price up for

now, with Class I price projected at \$14.64, Strook was quick to add that the present 80 percent party support level could soon be in trouble.

October inventories of government Commodity Credit Corporation stocks are up many times over the stocks of 1979. Storage warehouses are beginning to bulge with some 235 million pounds of butter powder, 317 million pounds of cheese and 558 million pounds of nonfat-dry milk powder.

Strook said the dairy products stockpiling has resulted from reduced consumer spending and the general economic situation, coupled with a sustained downhill slide of fluid-milk consumption. Even sales of cheese, recently a bright spot in the dairy marketing picture, are dropping off.

In light of the growing warehouse stocks and dropping fluid milk consumption, Strook told farmers that the 1981 Farm Bill is expected to put dairymen in a rather bad position, with the 80 percent support level likely to get the axe. Rather, the cooperative manager suspects price supports may be tied to a cost of production or target price as a gauge.

Adding his comments on the Holly Milk plant situation, Strook said the plant must help make a considerable contribution to MCMP's financial status during the next 12 months.

"I'm confident you have the plant, the equipment, the management and the workforce to meet that

goal," he added, "And that it's been a step in the right direction for market security, cooperative strength and member returns."

District 7 directors Emroy Kilgore, Airville, and Leroy Bupp, Seven Valleys, also spoke briefly. Kilgore urged the dairymen to be alert to the upcoming 1981 Farm Bill and to maintain close contact with elected representatives.

Bupp, who was re-elected during the meeting to a second term, briefed producers on a proposed Pennsylvania promotional referendum now in the planning stages.

If the referendum passed, it would require every dairyman in the state to pay into a promotional fund, probably at a rate of three-quarters of one percent per hundredweight. Maryland Cooperative members are now paying a checkoff of one percent.

That referendum would have to pass by a majority of the states milk producers, not just a majority of those who vote. Funding for promotional activities, if the referendum becomes reality, would increase available advertising monies from some \$4 million to over \$7 million.

Other speakers on the program included head fieldman Tom Moore and special guests York County Dairy Princess Tina Neufeld, Rep. John Hope Anderson and county agent John T. Smith.

PENNSYLVANIA AGRICULTURE

WE'RE GROWING BETTER

- DISTINCTIVE GARAGES
- POLE BUILDINGS
- COMMERCIAL BUILDINGS
- STORAGE BUILDINGS
- STEEL COLUMN BUILDINGS
- HORSE BARNs

The MELCO framing system was designed and engineered as a lightweight, versatile and low cost alternative to wood and rigid-frame systems.

MELCO buildings are adaptable to light manufacturing, storage, office, convalescent homes, restaurant, retail store, fire hall, maintenance garage, agricultural service, confinement dairy, live stock and numerous other uses

Less cost per square foot than conventional building methods!

SHORT OF CASH?
We will Trade Building for Backhoe • Truck
